HERITAGE

CHASING THE HORIZON

OUR HERITAGE ISN'T JUST HISTORY, IT'S A FAMILY WAY

For three generations, the Brands family has pursued the mission to make the working professional's job safer and life easier. In 1919, when Henry W. Brands moved west from Illinois, he set out on a path of discovery our company has never left since.

The original salmon filet knife that was created by COAST, the knife has a wooden handle and a spoon at the end of the handle.

Practical meets professional. Henry arrived in the rugged Pacific Northwest as a hardware salesman but quickly realized some of the tools in the back of his Model T weren't suited to his new home. Fishermen on the Oregon Coast told him they needed a stronger, sharper knife to fillet the 50-pound Chinook salmon still common then. So Henry went back to Portland, designed a better knife with a metal cleaning scoop on the back end of the handle, and returned to the dock with a knife that became so popular he couldn't keep up with demand. It was COAST's first innovation.

Knowing our customers' work and play. It's still true for us today: Nothing can replace a handshake, a conversation, or a cold beer. We spend time with our customers to hear first-hand what they're working on because knowing their real needs lies at the heart of all our designs. Whether it was the scribner's knife that helped timbermen mark trees for felling or the multi-tools we pioneered for tradesmen in the early 1980s, at every step we've focused on products that make a practical difference. Later, we took the market lead on handheld LED lighting and optical technology—with many patented technologies that transform a single light into a major workhorse. Today, COAST lights are a favorite among police officers, home DIYers, recreationalists, and more.

Never satisfied, always in pursuit. Roll up your sleeves, show some grit, keep on going. That's how we live out innovation at COAST. In everything we do, we start with function and work our way to sensible, streamlined designs. New products stand the test of tough work, just like the original fillet knife—and that's why the next product isn't just about technology, it's about tenacity on the job. We are committed to the working professionals who rely on our gear to get work done today and do it again tomorrow. After that, we hope they go big on the weekend.

COAST Products, a family-owned company have been producing LED torches, knives and multi-tools for work, recreation, and everyday use, for over 100 years.

COAST produces innovative, technologically advanced products backed by a warranty that makes the user's life safer, easier, and more enjoyable.

COAST warranties its knives, tools and LED torches to be free of defects in materials and workmanship for the life of the original purchaser. This warranty does not cover normal wear and tear, nor damage resulting from misuse or neglect. Warranty does not cover batteries and charging accessories (or damage caused by either).

COAST LIGHT LAB & ANSI FL1

COAST LIGHT LAB

COAST serves on the board of PLATO, which "promotes the common business interests of companies that manufacture portable lighting products."

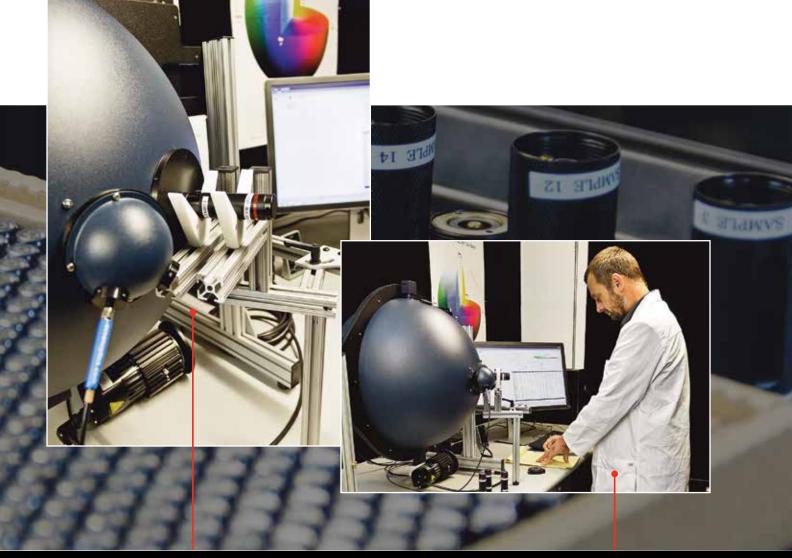

As part of our commitment to common business interests, COAST tests it lights to a set of standards (known as ANSI FL1) that make the comparison between lighting products clearer and easier. ANSI FL1 standards require that torches be tested to exacting standards under certain conditions to produce accurate and useful results for the consumer. COAST's in-house Light Lab allows us to do that accurately, efficiently, and with consistency.

ANSI FL1 SPECS

A quick FL1 primer: LIGHT OUTPUT (listed as lumens) is a measurement of how much light is being emitted. BEAM DISTANCE measures how far (in metres) a beam projects a useful amount of light, measured at 0.25 lux (approximately the equivalent of light emitted from a full moon "on a clear night in an open field"). RUN TIME is how long a torch will run with fresh batteries from 30 seconds after the torch is turned on until the light output reaches 10% of the initial measurement.

Here's an example:

ANSI FL1	High	Medium	Low
Lumens	620	220	64
Beam Distance	234m	134m	74m
Runtime	2h	4h 30min	34h

COAST LIGHT SPHERE

Ever wonder how a COAST torch gets its lumens rating? Our light sphere is the answer. Sophisticated technology for measuring sophisticated lights.

LAB TECH

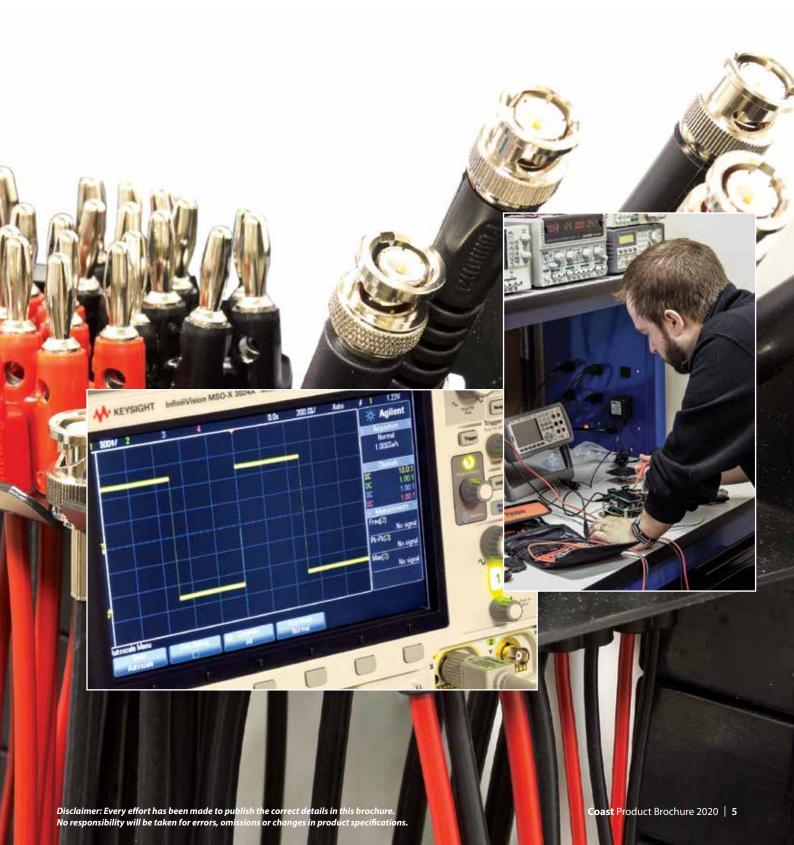

The Light Lab requires constant surveillance to operate at its best. Our in-house Lab Tech knows the equipment and speaks the ANSI language.

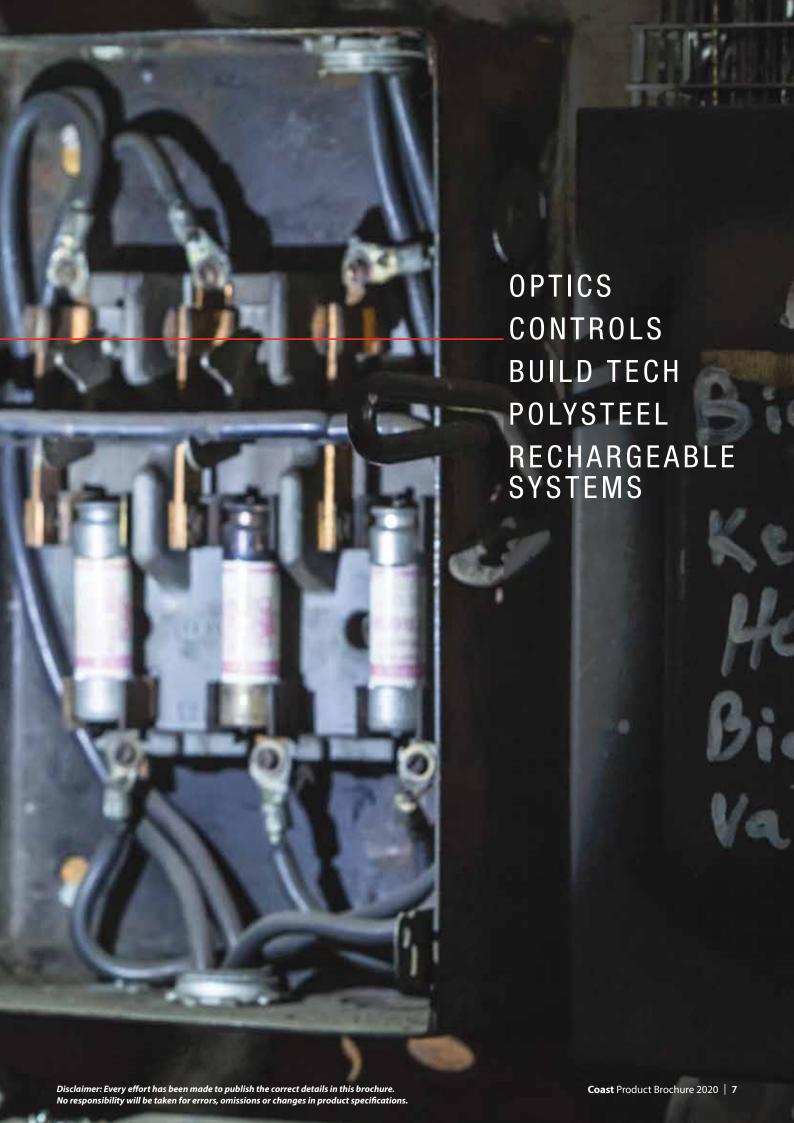

COAST TECH LAB

COAST TECH LAB

Creating new generations of lighting projects requires an investment in technology and a dedication to electronics testing and design. The COAST Tech Lab allows us to collect the data we need to give our newest torches the most advanced features and performance for their respective categories and price-points. Along with the Light Lab, this further demonstrates COAST's commitment to quality.

BEAM CONTROLS – FOCUSING SYSTEMS

SLIDE FOCUS

Spot to flood light control at your fingertips. Shape your beam with the simple push or pull of your thumb.

BEAM LOCK

Lock the beam anywhere you want it. Twist left to lock the beam in place. Twist back to the right to release.

TWIST FOCUS

Twist the head of the torch to move between a flood and a spot beam.

POWER CONTROLS – SWITCH SYSTEMS

QUICK-CYCLE SWITCH

Control your light power with the push of a button. Press once for full light power; press off and press on again for lower light power. In some models, press off once more and then on again for lowest light power. Certain torches also have a momentary switch—just partially depress the power button.

Some Coast torches include a special strobe feature. Once for full power; off/on again for strobe; off/on again for low light power.

High I Low High | Medium | Low High | Strobe | Low **High I Strobe**

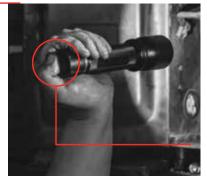

TAIL CAP DESIGN

Many of COAST's torches use a Quick-Cycle tail switch. A tail switch is a well-known feature in the tactical and professional markets, but not all users may be familiar with the design. One of the most common ways to hold a tail-switch torch is in one's fist, with one's thumb to the rear, touching the switch. This allows the torch to held up-and-away from one's body, which can provide useful changes in both beam direction and elevation.

COAST's tail cap design also allows many of our torches to stand up straight for vertical lighting applications.

FRONT SWITCH

Easy one handed on/off activation located near the head of the light.

MULTI-SWITCH

Separate power switches for different color modes.

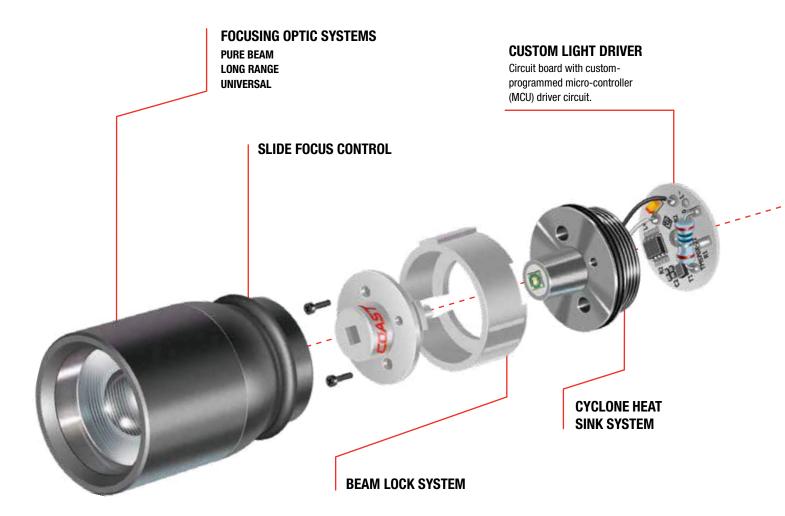

TORCH BUILD TECHNOLOGY

PURPOSE BUILT

COAST handheld torches are designed to provide both the internal and external functionality required to excel in their intended purposes. With innovative and patented technologies, as well as high-quality materials and finishing processes, COAST torches provide extraordinary function and value.

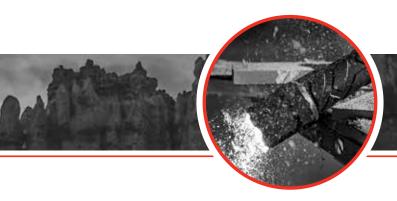

Not all design features present on all torches. *Some Coast torches also use coating materials in their construction.

DURABLE

COAST handheld torches are manufactured to withstand constant use. Metal construction*, heavy duty O-rings, and custom battery cartridges are all built to provide longevity and durability.

RECHARGEABLE HANDHELD LIGHT ALWAYS READY

NO MORE DOWNTIME

COAST's rechargeable handheld light are game-changers. Adding advanced rechargeable technology to our already outstanding optics and build quality, results in lights with quick-change, flexible power sources and exceptional long-term value.

POLYSTEEL

WATER Proof

TOUGH TECH

Take a tough-as-nails stainless steel core, cover it in grip-textured poly-nylon, add a focusing, Pure Beam Optic, and then top it off with COAST's exceptional warranty and you have POLYSTEEL.

POLYSTEEL torches have passed the IPX8-level waterproof test while under 3 metres (9.9 feet) of water for 6 hours. POLYSTEEL torches have also passed the ANSI FL1 drop test from up to 3 metres in height (depending on model). COAST has also done some real-world "tough testing," ultimately crushing a POLYSTEEL torch under the track of a massive logging loader. The result? The torch was still on, doing its job.

PURE BEAM FOCUSING OPTIC

Tough doesn't mean you have to skimp on features. All POLYSTEEL torches include COAST's patented Pure Beam Focusing Optic system for outstanding beam shape at all ranges.

TWIST FOCUS CONTROL

The same focusing system found on other highend COAST torches allows the user to focus the POLYSTEEL beam by simply twisting the head of the torch.

BEAM SHAPING & CONTROLS

BEAM SHAPING

The Twist Focus Ring makes it easy to go from Ultra View Flood Beam to Bulls-Eye Spot.

COAST head torches have several different power switch designs, but all are easy to use.

VARIABLE LIGHT CONTROL TECHNOLOGY (VLT)

COAST HEAD TORCHES OFFER THREE WAYS TO CONTROL LIGHT OUTPUT.

CONTROL WHEEL

Our patent-pending head torch light-control system employs a durable, easy-to-use sensor that detects a magnetic field.

LIGHT DIAL

Positioned on the side of the bezel of the head torch, the Light Dial allows for quickly controlling your light output at the turn of a knob.

CONTROL LEVER

Positioned on the back of some of our headlamps, rotate the lever for easy, one-handed light output.

ADDITIONAL TECHNOLOGY

REFLECTIVE SAFETY STRAP

Certain COAST head torches include a reflective safety strap for additional user visibility in low light.

HINGED BEAM ADJUSTMENT

ALL COAST head torches include a hinged, tilting head to let you adjust direction of the light beam.

HARDHAT COMPATIBILITY

Certain COAST head torches include clips for hardhat compatibility.

RECHARGEABLE HEADLAMPS

COAFL85R - (805672)

EAL TECHNOLOGY - MODES & DURABILITY

LIGHT MODES

COAST's EAL multi-mode technology allows the user to quickly adjust from energy conserving low light output to area-illuminating high output to anywhere in between. For emergency or night vision purposes switch to solid red mode or flashing red.

LONGEVITY

COAST's EAL energy-efficient LED technology provides users with up to 10 nights of light on one set of batteries, which can be critical in emergency situations, extended power outages and when batteries are in short supply.

Whether you choose the EAL12 (up to 38 hours of light on one set of batteries), or the big EAL20 (up to 80 hours of light on one set of batteries), you can be assured of energy saving technology.

WEATHERPROOF

High-quality materials and durable construction give COAST lanterns excellent weather resistance, making them great for use in emergency situations where there is inclement weather: rain, snow or wind.

EAL TECHNOLOGY - LIGHT CONTROLS

LIGHT DIAL

TURN DIAL TO SELECT LIGHT OUTPUT MODE

PUSH FOR POWER LIGHT MODES Go from high to energy saving via a dimmer, solid red and flashing red. Just dial-in what you need. BATTERY LIFE INDICATOR Makes it quick and easy to know how much battery life remains: green = full; red = empty

SMART SWITCH

Cycle through to optimal light mode.

5-M0DE

HIGH, MEDIUM, ENERGY SAVING, SOLID RED, **FLASHING RED**

ENERGY SAVING, HIGH, SOLID RED, FLASHING RED

COAEAL20 - (805074)

4 × D (not included)

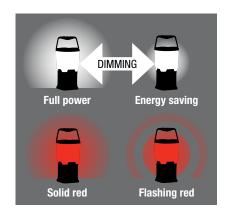

Height: 8.25" | 21.0 cm Weight: 36.5 oz. | 1.03 kg Built-in battery life indicator Foldable handle 5-year warranty

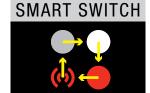

Our most advanced lantern, the EAL20 comes with a battery life indicator, dimming white light control dial, as well as solid red and flashing red modes.

COAEAL17 - 805073

4 × D (not included)

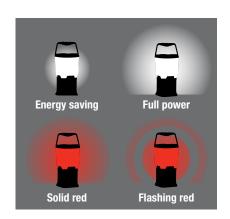

Height: 9.9" | 25.2 cm Weight: 45.4 oz. | 1.29 kg

Foldable handle 5-year warranty

On the worksite, campsite or on the side of the road, the EAL17 is a great stainless steel designed lantern that can either illuminate your space or alert people in times of need.

Run-time up to 50 hours

COAEAL12 - (805072)

4 × AA (not included)

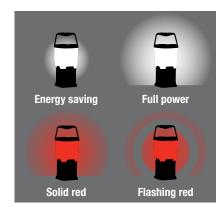

SMART SWITCH

Height: 6.125" | 15.6 cm Weight: 11 oz. | 312 g Foldable handle 5-year warranty Whether you are going camping or preparing for a winter storm, the EAL12 is a great compact lantern that because of the split handle can be easily hung on a branch or line.

Run-time up to 38 hours

MULTI-TOOL TECH - LIGHTING & TOOLS

LIGHT WHERE YOU NEED IT

COAST multi-tools are packed with practical tools and built-in LED torches to illuminate work surfaces. The spring-loaded pliers head and LED torches make them a great choice for working on the car, under the sink, or other tight spaces.

FUNCTION FEATURES

All implements easily accessible, jaw does not need to be opened.

Spring-loaded pliers for easy one-handed pliers operation.
