OUR INDUSTRIAL DIVISION

Our Industrial team is comprised of professionals who understand the needs of manufacturers, distributors and the Industrial consumer.

Our ever-broadening range of Materials Handling Products and International Tool Brands is paving the way for future growth for EHI and its partners.

Constant consultation with the market ensures that we continue to deliver what our customers and partners require.

QUALITY PRODUCT OFFERINGS

- Castors & Wheels
- Gas Springs
- Conveyors
- Materials Handling
- Abrasives & Wire Brushes
- Hand Tools
- Sprayers
- Key Steel & Shims
- Lighting
- Oil Cans & Reducteur

WHO WE ARE

Our expert team works with our international affiliates to consistently supply our partners and customers with quality, leading-edge products at value for money prices.

We have warehouses and sales offices strategically placed throughout Australia and New Zealand to ensure that our network can efficiently satisfy the increasing demands of industry.

OUR MISSION

Continuous provision of an extensive range of quality products and an exemplary service to Hardware and Industrial stakeholders.

OUR VISION

To bring to the market a range of products that are aligned with the needs of our customers.

We will continually aspire to build strong, long-standing relationships with our distributors and direct customers.

WHEEL MATERIAL

When selecting a wheel for your application, there are a number of matters that require consideration. Factors such as the required load capacity, the surface they're going to be used on, the desired ride quality and frequency of use, all play an important part in the final wheel selection.

Our knowledgeable sales team are happy to help you make the right choice for your application.

	Shock Absorbency	Load Capacity	Push Effort	Floor Protection	Durability	Typical Surfaces	Comments
Polyurethane 	Good	Excellent	Good	Good	Good	All surfaces, irregular	Best all round choice
Grey Rubber 	Excellent	Good	Fair	Excellent	Good	Quality flooring, quiet or clean areas	Good protection for floor & loads
Blue Rubber 	Excellent	Good	Fair	Excellent	Good	Quality flooring, rougher surfaces	Highest shock absorbency
Black Rubber 	Excellent	Good	Fair	Good	Fair	Industrial areas, concrete	Good shock protection on industrial floors
Pneumatic 	Excellent	Fair	Poor	Excellent	Good	Outdoor, irregular or unsealed	Best over irregular surfaces. Highest resilience
Nylon 	Fair	Excellent	Excellent	Fair	Good	Smooth concrete	Strong & economical. May be noisy
Cast Iron 	Poor	Excellent	Excellent	Poor	Excellent	Oven floors, outdoors / unsealed, broken glass	Strong & hard wearing. Best for high temperature. May damage flooring

LOAD CAPACITY

Load capacity is perhaps the most important consideration when selecting the correct castor or wheel. If the capacity of the selected item is too low, the castor may fail, causing damage or injury.

The load capacity of the castors and wheels in this catalogue relates to the amount that each castor or wheel will carry, on an average floor at speeds up to 4 km/h.

When fitting these to a trolley, the load carrying capacity of the trolley is not simply the sum of the capacities of the castors fitted. It varies significantly relative to the number of castors/wheels and mounting arrangement selected.

TOTAL LOAD: The total load is the amount of weight the castor or wheel must support. It consists of the weight of the physical trolley plus the amount of weight the trolley will be required to carry.

TOTAL LOAD = Weight of Trolley + Carrying Capacity of Trolley

Two Wheel Trolley 	This type of construction requires the two main wheels or castors to carry almost 100% of the load at all times. The load is normally distributed 50:50 across the two wheels, however, uneven ground may increase the load on one wheel to approximately 65:35. Recommended Load Capacity per Wheel = 65% of TOTAL LOAD. (i.e. If TOTAL LOAD = 100Kg, each wheel should have a minimum load capacity of 65Kg)
Three Wheel Trolley 	Common on drum dollies and plant pot holders, three wheel trolleys will have all wheels on the ground at all times, even over uneven ground. Three wheel trolleys may become unstable when a tall item is supported and a side load is applied in a direction 'between' two castors. If this happens, the total load will be applied to only two castors. Recommended Load Capacity per Castor = 50% of TOTAL LOAD. (i.e. If TOTAL LOAD = 100kg, each castor should have a minimum load capacity of 50kg)
Four Wheel Trolley 	By far the most common style, four wheel trolleys are inherently stable. In general use, on a level floor and with an evenly distributed load on the trolley tray, each castor is loaded at 25% of the total load. However, when on an uneven floor, one castor may lose contact with the floor and the total load will be carried by only three castors. Recommended Load Capacity per Castor = 35% of TOTAL LOAD. (i.e. If TOTAL LOAD = 100kg, each castor should have a minimum load capacity of 35kg)
Six Wheel Trolley 	In this design, the trolley is fitted with six wheels that are all in contact with the floor. This design is very good at carrying higher total loads (than a standard four wheel trolley) on level floors where each castor is only loaded to 17% of the total load. However, this design suffers when used over convex or concave floors. Convex floors (hill shaped) will force the trolley to 'rock' on just the central pair of castors while a concave floor forces the central pair of castors to lift free of the floor. Recommended Load Capacity per Castor (level floors only) = 25% of TOTAL LOAD. (If using over concave/convex floors, a 'Six Wheel - Rocking' configuration is recommended)
Six Wheel - Rocking 	This special design has castors mounted at different heights. Usually, the central pair of fixed castors or wheels are 12mm to 25mm 'higher' than the corner castors. This causes the trolley to 'rock' or sit in a non level position. Very good for manoeuvrability but requires higher capacity castors to other designs. Recommended Load Capacity per Castor (centre) = 50% of TOTAL LOAD. Recommended Load Capacity per Castor (corners) = 35% of TOTAL LOAD.
Multi Wheel Trolley 	Where the trolley does not fit into any of the above categories, the following general formula can be used to help determine the correct load capacity. Recommended Load Capacity per Wheel = (125% of TOTAL LOAD) ÷ (number of castors fitted) i.e. If TOTAL LOAD = 1,000kg and the trolley has 10 castors fitted then each castor should have a minimum load capacity of 1250kg ÷ 10 = 125kg each.

BEARING TYPES

The type of wheel bearing has a significant influence on the operating properties of a castor upon which it is fitted, which in turn affects the mobility of the equipment.

Wheel bearings must meet the most varied requirements, such as load capacity, duration of use, environmental influences, resistance to impact shock, resistance to rolling and resistance to weather etc.

Plain Bearing 	Plain bearings consist of a bearing shell solidly connected with the wheel. The wheel turns around the axle tube bolted to the housing. Wheels made of polyamides have gained general acceptance for this form of bearing, due to the material's natural lubricating properties. Plain bearings are used traditionally for transport equipment that will not be moved much. Under normal conditions plain bearings are maintenance free and corrosion-resistant.
Roller Bearing 	Roller bearings consist of steel or stainless steel needle rollers that are positioned in a cage. These rollers roll between the axle tube and the wheel hub. Since, in turning around the axle, no sliding friction but rather rolling friction occurs, the resistance to rolling of the bearing is relatively low, even at high loads. Roller bearings are resistant, robust and low maintenance.
Unground Ball Bearing 	Ball bearings are compact, simple bearing units. They consist of a moulded sheet metal housing, in which balls roll between the inner and outer rings and which has an elongated axle unit.
Precision Bearing 	Precision ball bearings consist of balls that run between a tempered inside and outside ring. Even under extreme loads and at high speeds, this bearing demonstrates very good operating properties. These bearings meet the most stringent demands for load capacity, resistance to environmental influences and easy running. Due to the bearings being sealed, life-long lubrication can be guaranteed even under extreme environmental conditions. When used at very high load capacities, the single-row deep-groove ball bearing is usually replaced with tapered precision bearings to enhance resistance to side loads.

BRAKE TYPES

Taking a supermarket trolley up a travelator, pushing a hospital bed down a corridor or leaving an industrial trolley on an inclined floor, are all examples of where there would be a benefit in fitting brakes or directional locks to the apparatus being pushed.

Brakes do more than just hold an item stationary, a directional lock brake can help to push a trolley in a straight line down a busy corridor and a travelator brake activates automatically when a shopping trolley enters a travelator.

A - No Brake 	No braking mechanism is fitted to these castors. Throughout this catalogue, most castors that are not fitted with any type of brake have the character 'A' as the fourth character of their product code.
D - Directional Lock 	A directional lock brake does not stop rotation of the wheel. Instead, a directional lock brake will allow the castor to swivel until the direction the wheel is facing is parallel to the unit. Once the castor has swivelled to this point, the brake stops all swivelling action and forces the castor to track in a straight line.
W - Wheel 	When a wheel brake is applied, it only stops the rotation of the wheel. The castor is still able to swivel freely. Special caution should be noted, that wheel braked castors should never be fitted to a bench or table containing power tools or cutting instruments as a wheel brake castor can allow the table to move to a distance equal to twice the castor's offset, which on a 200mm castor may mean that, even with the brakes on, a table could move 100mm to 150mm without warning.
T - Total Lock 	When the total lock brake is applied, it stops both the swivel action and the wheel rotation. This is the safest of all brake types.
Central Locking 	Functionally the same as a standard total lock and directional lock brake, this special variation is only found on hospital bed castors. These castors are interconnected by hexagonal steel bar so that when the brake is applied, all castors brake at the same time. Hospital beds often use different types of brake castors fitted to each corner of the bed. One of these castors actually has three braking functions; total lock + no brake + directional lock.
Travelator 	The travelator brake is a special brake specifically for supermarket trolleys. The brake is designed to stop the trolley moving when travelling up or down on the travelator. These brakes operate in a number of different ways. Some have sliding disks that slip into the channels of the travelator floor. Others have a fixed brake pad and ribbed tyres (pictured). When the ribbed tyres fall into the channels on the travelator floor, the weight of the trolley is suspended by the brake pad.

CASTORS

F1 SERIES FURNITURE CASTORS

Description:

- An economical castor ideal for light duty applications.
- Zinc plated steel mounting plates and pintles ensure a secure fixing.

Capacities: 50kg - 60kg

The F1's simple design and affordability make it ideal for:

- Small furniture
- Night tables
- Side tables and chairs
- Sales counters
- Entertainment units
- White boards
- Small trolleys
- Beds and Over-bed tables
- Kitchen benches
- Other general furniture

G1 SERIES BOLT HOLE

Description:

- Attractive light duty castor with a bright zinc finish.
- Suited to a variety of shopfitting, display, furniture and equipment uses.
- Double headset bearing for strength and a smooth swivelling action.

Capacities: 40kg - 55kg

G1 series is ideal for:

- Racks and display cabinets
- Sales counters
- Home and office furniture
- Kitchen island benches
- Medical furniture

Refer to page 01-29 for expanding adaptor options.

G2 SERIES BOLT HOLE

Description:

- The twin wheel design allows good manoeuvrability over most surfaces.
- Equipped with a double headset bearing for a smooth swivelling action.

Capacities: 70kg - 90kg

With its stylish design and bright zinc finish the G2 series is ideal for:

- Racks
- Display cabinets
- Sales counters
- Chairs
- Kitchen island benches
- Beds
- Medical furniture
- Office furniture
- Patient lifters

G6 SERIES BOLT HOLE

Description:

- Attractive sleek design with bright zinc finish.
- Double headset bearings for added strength, long life and smooth swivelling action.
- Headset seals protect bearings from dust and other foreign matter.
- Rugged glass filled nylon brake assembly.
- Colour coded pedals (Total brake - red, direction lock - green).
- Non-marking rubber and urethane wheels come standard with sealed precision bearings, which reduce rolling resistance and noise.
- These high quality, institutional castors are versatile and built to last.

Capacities: 80kg - 120kg

G6 series is ideal for:

- Medical trolleys and equipment
- Hospital beds
- Medicine trolleys
- Food delivery trolleys
- Display and shop fitting equipment
- Commercial and domestic furniture

H6 SERIES - THREADED STEM

Capacities: 75kg - 110kg

Description:

- Precision bearings to minimise push effort required.
- Designed to protect the axle and bearings from hair/water.
- Durable urethane tread.

Ideal for applications such as:

- Medical trolleys and equipment
- Hospital beds
- Medicine trolleys
- Food delivery trolleys
- Electronic equipment
- Patient lifters
- Nursing home beds

Developed for use in medical and institutional applications.

I1 SERIES - PLATE

Description:

- Robust, simple industrial design.
- The large diameter, single headset bearing gives strength whilst maintaining a low overall height.

Capacities: 40kg - 120kg

Ideal for applications such as:

- Tool boxes
- Engine cranes and gearbox dollies
- Workshop equipment
- Roll pallets, trolleys, drum and floor dollies
- Vending machines and arcade games
- General materials handling equipment

CASTORS

i2 SERIES - PLATE

Description:

- Strong, reliable castors which have high load capacities and abrasion resistant cast iron wheels.
- The large diameter headset bearing increases strength whilst maintaining a low overall height.
- The absence of plastic components makes them ideal for high temperature applications.
- The domed wheel design reduces rolling and swivel resistance.

Capacities: 55kg - 225kg

Ideal for applications such as:

- Industrial and mechanical equipment
- Work benches
- Dollies
- Engine hoists and jacks
- Tool boxes
- Workshop equipment
- Floor creepers
- Industrial ovens

i4 SERIES - BOLT HOLE

Description:

- A general purpose industrial castor which is simple, reliable and economical.
- Double headset bearings for added strength.
- Robust metal brake assembly.
- Polypropylene wheels use a plain bearing to minimise cost.
- Bright zinc finish.

Capacities: 80kg - 100kg

Ideal for:

- General trolleys
- Dollies
- Stillages
- Heavy capacity shop fittings
- Medical equipment
- Catering equipment
- Roll pallets
- Materials handling equipment
- Warehouse and industrial applications

CASTORS

i4 SERIES - PLATE

Capacities: 80kg - 200kg

Description:

- Light industrial range with a sturdy and economical design.
- The polypropylene wheels are plain bearing to minimise cost and the grey rubber castors are fitted with precision bearings for a smooth rolling action (roller bearings for 160mm & 200mm).
- Double headset bearings for added strength.
- Robust metal brake assembly.
- Headset seals come as standard.
- Bright zinc finish.

Ideal for:

- General trolleys
- Dollies
- Stillages
- Heavy capacity shop fittings
- Medical equipment
- Catering equipment
- Roll pallets
- Materials handling equipment
- Warehouse and industrial applications

CASTORS

i6 SERIES - BOLT HOLE

Capacities: 90kg - 140kg

Description:

- Double headset bearings for increased strength and improved manoeuvrability.
- Headset seals and wheel caps protect and increase the lifespan of the bearings.
- Thick steel construction allows the castors to withstand high shock loads.
- All wheels come standard with bearings and wheel guards.
- Resilient rubber wheels to prevent flat-spotting.
- Non-marking, elastic rubber tyres absorb shock loads while reducing friction and operating noise.
- Equipped with double headset bearings and sealing rings to keep out dust and debris.
- Bright zinc finish.

Ideal for such uses as:

- General trolleys
- Heavy capacity shop fittings
- Medical equipment
- Catering equipment
- Pharmaceutical equipment
- Materials handling equipment
- Warehouse and industrial applications

CASTORS

J2 SERIES PLATE

Capacities: 200kg - 455kg

Medium / Heavy Industrial

- Dust sealing rings to increase the life of the bearings.
- Heavy duty fabricated construction allows castor to withstand high impact loads.
- Available with nylon, cast iron, non-marking resilient rubber, urethane and urethane on cast iron.
- Grease nipple to headset bearings.
- All wheels come with precision bearings.
- Robust brake assembly with adjustable brake.

Suitable for a wide range of applications including:

- General and stock picking trolleys.
- Dollies and stillages.
- Catering and industrial laundry equipment.

CASTORS

J7 SERIES PLATE

Capacities: 500kg - 800kg

Description:

- The J7 Range is suitable for a variety of heavy duty applications in waste bin, mining, construction, military, airports, warehousing and many other industries.
- 5/8" High tensile axle bolt to handle high impact loads.
- Heavy duty fabricated construction with double welded fork for an extremely strong and durable castor.
- Enlarged top plate holes for speedier installation.
- Excellent head seal to prevent the ingress of dust and grit.

Ideal for:

- Waste Bins
- Mobile Work Benches
- Heavy Machinery

CASTORS

TG SERIES - PLATE

Capacities: 535kg - 600kg

Description:

- Double headset bearings for smooth swivelling action with hardened raceway for added strength.
- Heavy duty fabricated construction allows castor to withstand high impact loads.
- Available in rubber on cast iron, urethane on cast iron and cast iron wheels.
- Robust brake assembly.

Suitable for a wide range of heavy duty applications including:

- General and stock picking trolleys
- Dollies and stillages
- Catering and industrial laundry equipment etc.

CASTORS

TH SERIES - PLATE

Capacities: 900kg - 1500kg

Extra Heavy Industrial

- The kingpinless swivel has a heavy duty forged steel top plate joined to an outer swivel ring by a full complement ball race running in hardened tracks.
- Heavy duty fabricated construction allows castor to withstand high impact loads.
- The closed head ring creates a grease reservoir preventing the escape of the headrace lubricants.
- Robust brake assembly.

Suitable for a wide range of heavy duty applications including:

- Heavy machinery
- Dollies and stillages
- Gantries, mobile work benches
- Ship yards
- Mining etc.

CASTORS

X1 SERIES - PLATE

Super Heavy Industrial

- Kingpinless swivel.
- The top plate is made from 3/8" AISI 1045 heat treated steel.
- Heavy duty fabricated construction allows castor to withstand high impact loads.
- The frames are welded inside and out to increase strength and life span.
- 3/4" axle.
- Zinc plated finish.

Capacity: 2000kg

Suitable for a wide range of heavy duty applications including:

- Heavy machinery
- Dollies and stillages
- Gantries
- Mobile work benches
- Mining, military and airport applications etc.

NEW Twist Locks

TWISTLOCK now available to suit X1 series and make your containers mobile.

- Add Twistlock and X1 castors to containers for easy movement.
- Requires welding.
- Load capacity dependant on X1 castor used.
- **CODE: TWISTLOCK**

SPECIALTY CASTORS

G7 SERIES - BOLT HOLE - STAINLESS

Description:

- Attractive sleek design.
- Double headset bearings for added strength, long life and smooth swivelling action.
- Headset seals and wheel guards protect bearings from dust and other foreign matter.
- Rugged glass filled nylon brake assembly.
- Non-marking rubber and urethane wheels come as standard with stainless steel precision bearings, which reduce rolling resistance and noise.
- These high quality institutional castors are versatile and built to last.

Capacities: 80kg - 100kg

Ideal for:

- Medical trolleys and equipment
- Hospital beds
- Medicine trolleys
- Food delivery trolleys
- Display and shop fitting equipment
- Commercial and domestic furniture

SPECIALTY CASTORS

G7 SERIES - PLATE - STAINLESS

Capacities: 80kg - 100kg

Description:

- Attractive sleek design.
- Double headset bearings for added strength, long life and smooth swivelling action.
- Headset seals and wheel guards protect bearings from dust and other foreign matter.
- Rugged glass filled nylon brake assembly.
- Non-marking rubber and urethane wheels come as standard with stainless steel precision bearings.
- These high quality institutional castors are versatile and built to last.

Ideal for:

- Medical trolleys and equipment
- Hospital beds
- Medicine trolleys
- Food delivery trolleys
- Display and shop fitting equipment
- Commercial and domestic furniture

SPECIALTY CASTORS

S5 SERIES - PLATE - STAINLESS

Capacities: 150kg - 230kg

Description:

- These stainless steel castors have been developed for use in medical, institutional and food preparation environments.
- Stainless steel roller bearings standard on all wheels.
- Made from high quality grade 304 stainless steel.
- They come equipped with shielded double headset bearings for a smooth swivelling action.
- Ideal for use in environments where they will be exposed to cleaning agents, moisture, steam and caustic or other corrosive chemicals.

Ideal for:

- Medical trolleys and equipment
- Hospital beds
- Medicine trolleys
- Food delivery trolleys
- Food prep areas
- Pharmaceutical equipment

SPECIALTY CASTORS

HIGH TEMPERATURE CASTORS ZINC AND STAINLESS STEEL

Capacity: 160kg

Manufactured in Italy

- Extremely hard wearing, they roll well even on relatively soft surfaces and will not mark floors.
- Resistant to water, most solvents, oils, acids, chemicals and has excellent fire-smoke toxicity properties.
- Certified for use in the food industry and for any oven application requiring continuous exposure to temperatures up to +280°C with peaks of + 300°.
- Permanent lubrication approved by FDA-USDA for contact with foods.
- Computerised control of swivel head double ball race and assembling tolerances assures perfect swivelling without locking point.
- RoHS - REACH compliant.

Ideal for:

- Use in freezers, they can be exposed to temperatures as low as -40°C and are resistant to thermal shock due to rapidly rising or falling temperatures.

SPECIALTY CASTORS

SCAFFOLD CASTORS

Capacities: 200kg - 900kg

- High quality Revvo castors designed specifically for scaffold applications.
- 200mm diameter castors are certified to meet Australian and New Zealand Standard AS/NZS1576.2 2009.
- Custom pintles can be designed and manufactured to meet individual requirements.

SCAF200PNGST1S

- Zinc plated for a long service life.
- Hard wearing polyurethane tyred nylon wheel.
- 200mm diameter castors are marked with safe working load capacity.
- Threaded stem castor fitted with total lock brake.

SCAF200PNGTS

CASTORS ACCESSORIES

L SHAPE - CORNER BUFFER

- Fitted to mobile equipment to protect walls and furnishings when using the equipment internally.
- Robust plastic body to cushion impact and ensure durability.
- Reinforced metal bolt holes for a strong fit.
- Ideal for hospitals, nursing homes and offices etc.

LENGTH (MM)	THICKNESS (MM)	PRODUCT CODE
100	21	BUFFER100X100

ROTARY - BUFFER

- Protects walls and furnishings when using mobile equipment internally.
- Strong air filled plastic shell.
- Designed to rotate along contact surface and reducing impact.
- Suits 1" OD round tube.
- Ideal for hospitals, nursing homes and offices etc.

DIAMETER (MM)	THICKNESS (MM)	BORE ID	PRODUCT CODE
125	49	1" RND	BUFF4R25

FLOOR LOCKS

- Floor locks are for use where conventional castor brakes cannot provide sufficient braking force. Also suitable for use with pneumatic wheels where brakes are normally not an option.
- Heavy duty industrial strength construction.
- Non-slip rubber pad holds securely on smooth floors.
- Durable high compression spring for heavy loads.
- Attractive zinc plated finish on FL locks.

EXTENDED HEIGHT (MM)	RETRACTED HEIGHT (MM)	PLATE SIZE (MM)	HOLE CENTRES (MM)	PRODUCT CODE

247	219	114 x 102	77-92 x 67-76	FL8

CASTORS ACCESSORIES

EXPANDING ADAPTORS

Expanding adaptors are used in conjunction with bolt hole castors to allow you to fit the castor to the end of round or square tubing. You simply screw the adaptor onto the threaded bolt protruding from the top of the castor, insert it into the tubing and then turn the bolt. As you turn the bolt, it compresses the adaptor towards the head of the castor. This forces the adaptor to expand inside the tube, holding the castor in place.

- A low cost and reliable way of fitting castors to tubing.
- Great for light duty trolleys and equipment.
- Able to suit round tubing from 16mm-32mm.
- Able to suit square tubing from 19mm-32mm.
- Able to suit either M12 or M10 bolts.
- Available in adaptor and bolt kits or the adaptors only.

SUIT TUBE ID	TUBE ID RANGE	TUBE SHAPE	THREAD SIZE	ADAPTOR CODE	ADAPTOR + BOLT CODE

GAS SPRINGS

GAS SPRINGS

EHI Australia is the distributor for Bansbach easylift gas springs. Bansbach gas springs are manufactured out of the highest quality, environmentally friendly materials. These precision made products are used throughout the aerospace industry as well as in medical equipment and furniture. For more information go to www.bansbach.com.

Bansbach
easylift

**Bansbach gas springs
are custom made to order
in Germany.**

CERTIFIED QUALITY

Bansbach Gas springs are manufactured out of the highest quality, environmentally friendly materials. Consistent quality is guaranteed because of diligent monitoring of raw materials, an aggressive testing program and a redundant quality control program throughout the production process. Re-ordered products are consistently produced accurately by using our technologically advanced manufacturing processes.

CONNECTING PART

Connecting parts available in many variations.

CYLINDER

Cylinder out of steel and powder-coated.

PISTON

Piston for speed control.

GUIDING PIECE

A high-quality and unique guiding piece with integrated grease chamber.

CERAMPRO

CeramPro piston rod, extremely rust and corrosion resistant.

CONNECTING PART

Connecting parts available in many variations.

ADVANTAGES OF BANSBACH GAS SPRINGS:

- Highest corrosion resistance achieved through powder coated cylinders and CeramPro® treated piston rod surfaces
- Minimal friction for the production of lowest extension forces
- Best life cycles
- Protection against vibration and light side forces
- Integrated grease chamber
- Low break away forces
- Installation and storage in any position

WHEELS

PNEUMATICS - NYLON RIMS

- Perfect for use on uneven or unsealed ground.
- Thick and chunky tread for extra grip.
- Cushions impact on rough terrain.
- High quality construction incorporating durable materials.
- All wheels come with butyl inner tubes.

Great for use with:

- Hand trucks
- Trolleys
- Nursery trolleys
- Delicate sensitive equipment
- Hand carts
- Wheelbarrows
- Mobile generators and equipment that requires impact cushioning or to be taken over rough terrain.

WHEELS

FOAM FILLED - PUNCTURE PROOF

- Airless puncture proof wheels are filled with foam.
- Rubber tyre ensures greater durability when compared with other puncture proof alternatives.
- Ideal for applications where punctures are a problem.
- All terrain, suitable for use on uneven or unsealed ground.
- Ideal for hand trucks and other materials handling equipment.

Make your containers mobile with the new **TWISTLOCKS**

- Add Twistlock and X1 castors to containers for easy movement.
- Requires welding* enquire for pricing.
- Load capacity dependent on X1 castor used.

Code: TWISTLOCK

TWISTLOCK

Now available to suit X1 series

X1 Series

Up to 2 Tonnes/castor.

Container Movement Made Easy!

LIGHT DUTY P HANDLE TPH150

- Light duty trolley with P handle, for easy one hand manoeuvring.
- Puncture proof poly rim wheels for a smooth ride whilst eliminating expensive downtime.

LOAD CAPACITY	DIMENSIONS	FLAT FREE WHEEL	TOE PLATE
150kg	1310x565mm	3.00x4	350x180mm

HEAVY DUTY P HANDLE TPH270

- Heavy duty trolley with P handle, for easy one hand manoeuvring.
- Large puncture proof steel centred wheels for a smoother ride and reduced push effort.

LOAD CAPACITY	DIMENSIONS	FLAT FREE WHEEL	TOE PLATE
270kg	1310x565mm	3.50x4	350x180mm

SACK TROLLEY TST150 / TST250

- Multi purpose with fully welded steel frame.
- Fitted with 265mm puncture proof wheels for reduced push effort.

PRODUCT CODE	LOAD CAPACITY	DIMENSIONS	PNEUMATIC WHEEL	TOE PLATE
TST150	150kg	1180x590mm	3.50x4	430x220mm

SPECIALTY TROLLEYS

DOUBLE CYLINDER TROLLEY TDCT200

- Can carry one or two (D or E) cylinders
- Fully welded frame for maximum strength and longevity
- Comes with double security chain

LOAD CAPACITY	DIMENSIONS	SOLID RUBBER WHEEL	TOE PLATE
150kg	1000x560mm	160mm	440x200mm

DOUBLE OXY TROLLEY TDOT200

- Heavy duty construction to carry two (G) cylinders at the same time.
- Fully welded frame for maximum strength and longevity.
- Comes with security chain.

LOAD CAPACITY	DIMENSIONS	FLAT FREE WHEEL	TOE PLATE
250kg	1200x740mm	4.00x6	570x160mm

CONVERTIBLE HAND TRUCK TCT200

- Heavy duty 200-300kg load capacity.
- Versatile hand truck easily converts into a platform trolley.
- Increased flexibility to handle larger/heavier loads.
- Fitted with castors and flat free wheels for a smooth ride.
- Tough steel frame for durability.
- Easily converts from a 2 wheel upright trolley to a 4 wheel platform truck.

New! 2 in 1 Functionality.

ROCKET CUTTING DISCS

GENERAL PURPOSE DRY CUTTING

- Cuts bricks, blocks and concrete.
- Can be used to cut non ferrous metals.
- Complies to AS 1788.1-1987 DIN EN 12413.
- Always use safety guards.
- Always wear protective clothing and safety equipment.
- Do not exceed the maximum safe speed.

GENERAL PURPOSE STEEL AND STAINLESS STEEL CUTTING

- Quick cutting action.
- Cooler cutting action.
- Use on harder metals.
- Complies to AS 1788.1-1987 DIN EN 12413.
- Always use safety guards.
- Always wear protective clothing and safety equipment
- Do not exceed the maximum safe speed.
- 100mm x 115mm & 125mm available in a protective metal can containing 10 discs.
- Metal can protect discs from damage and avoids contact with chemicals.

ROCKET ABRASIVE PRODUCTS

DOUBLE DENSITY FLAP DISCS

- Made in Europe to din en13743 from zirconia in a range of grits.
- For use on angle grinders.
- Largely used for rust removal, slag removal, deburring and weld removal.
- Can be used effectively on stainless steel, steel, iron and other non ferrous metals.
- The lower the grit number, the more aggressive and coarse the disc will be.

ROCKET BRUSHWARE

TWIST KNOT WHEELS

- Filled with high quality carbon steel wire.
- Can be fitted onto an angle grinder or bench grinder.
- Largely used for slag and rust removal.
- Twisted wire acts more aggressively than crimped wire.
- Shape of brush is ideal for rounded and irregular surfaces.

All grinders both air and electric, Asian or European, have M10 x 1.5 threads for grinders UP TO 100mm. All grinders 115mm and above have M14 x 2 threads. Always use stainless steel brushes on stainless steel jobs. RPM should match the RPM of your angle grinder. The brush should not be run above it's maximum RPM safe speed rating.

INDUSTRIAL BRUSHWARE

CONDENSER AND BOILER TUBE BRUSHES

- Condenser and boiler tube brushes are bound with a spiral of tempered steel held together with a wire core.
- Ideal for cleaning the inside of pipes (including threaded pipe and O ring slots etc).
- Can be fitted to drill chuck using extremely low speed (less than 80rpm). Brushes will bend or snap if used at speeds above 80rpm.
- A 1.5m flexible extension is available for the boiler tube brushes, which attaches to the threaded section of the brush. This allows you to push the brush through longer pipes. This extension is not suitable for the condenser tube brushes. Condenser tube brushes are often pulled through a pipe by fishing line or similar.

SOFT STEEL

- Used in mining, construction and excavation industries.
- For striking hard metal surfaces such as hardened pins, rail road spikes and excavator teeth.
- Similar hardness to brass. Max' = 30R Rockwell hardness.
- Reduces shearing and shattering when striking hardened steel.
- Blue heads marked 'S' for 'Soft'.
- Nuplaglas Ergonomic Super Grip handles.

N28-535	3lb Hammer (1.34kg) (250mm handle)	1	2
N28-545	4lb Hammer (1.79kg) (250mm handle)	1	2

FIBRE GLASS TECHNOLOGY

Nupla handles represent the latest technology in fibreglass tool handle production. SuperDuty Nuplaglas pultruded structural core with reinforcement sections at critical stress points, with an injection moulded clad exterior jacket of tough engineering polymer. This design optimises the inherent strength of Nuplaglas, and the ergonomic qualities realised in our injection moulding process. The handles provide the user with safety, comfort and strength in all heavy-duty industrial applications.

HANDLES

- Handles come with an epoxy kit or tapered end for easy replacement. All handles have a solid fibreglass core and carry a 10 year warranty.

PART	DESCRIPTION	MIN. BUY	BOX QTY
N55-551	900mm Mattock/Pick Handle. Slip On Fit	1	1

N59-834	900mm/16-20lb Sledge Handle. (7.16 - 8.96kg) Comes With Epoxy Kit	1	1
N68-800	Shovel Long Handle 1200mm, Tapered End. Comes With Rivet	1	6
N68-803	Shovel D Handle 762mm, Tapered End. Comes With Rivet	1	6
*N68-660	Hoe Handle 1525mm. Slip On Fit	1	1

EPOXY KITS

PART	DESCRIPTION	MIN. BUY	BOX QTY
N39-024	Single Use 2 Part Epoxy Kit (24g)	1	1

Items marked "" are special order.

- All handles (excluding tapered end) comes complete with a 2 piece single use epoxy kit. Additional kits are available. Epoxy kits are easy to use, as per simple instructions below:

FIBRE GLASS TECHNOLOGY

1000 VOLT CERTIFIED NON CONDUCTIVE DIGGING TOOLS

- 100% Testing at 10,000 volts to exceed IEC 60900 and ASTM F1505 standards.
- Each tool etched with traceable test serial number.
- Manufactured in Safety Orange for easy identification of electrical protection.
- Handles marked with 1000V high voltage double diamond.
- Used by Utilities, Railroads, Councils and Electrical Contractors.

FIBRE GLASS TECHNOLOGY

BALL PEIN HAMMERS

- Comprising of a ball point end and flat faced end, the ball pein hammer is most commonly used when working with metals.
- The Nupla ball pein hammer handles are constructed from high quality original Nuplaglas inclusive of a serrated grip to reduce fatigue, whilst the heads are constructed from forged tool steel.

PART	DESCRIPTION	GRIP	HANDLE SIZE	MIN. BUY	BOX QTY

IMPAX® SOFT FACE DEAD BLOW HAMMER SET

- Set includes fibreglass hammer handle with 8 tips in varying hardnesses.
- The tips are ideal to eradicate metal contamination when working with stainless steel.
- Rubber face prevents scratching of work surface.
- Non slip rubber grip handle for ease of use.
- Replacement tips available.

PART	DESCRIPTION	MIN. BUY	BOX QTY
N02-358	Set 450gram Dead Blow 38mm Dia	1	1

DEAD BLOW HAMMERS

- Dead Blow hammers all have a chamber inside the head that contains lead shot. The purpose of the lead shot is to absorb the rebound of a strike; the shot shifts forward a fraction of a second after the impact to absorb the recoil, also increasing the impact force.

PART	DESCRIPTION	MIN. BUY	BOX QTY
N10-010	1lb Dead Blow (0.44kg). 15/8" face. 300mm handle.	1	5
N10-020	2lb Dead Blow (0.89kg). 2" face. 350mm handle.	1	5
N10-030	3lb Dead Blow (1.34kg). 21/2" face. 350mm handle.	1	2
N10-040	4lb Dead Blow (1.78kg). 27/8" face. 350mm handle.	1	2

GEDORE RED SOCKET SETS

NEW

GEDORE RED SOCKET SET SIZE 4-13mm 16PCS

Description:

- Coupler based on DIN 3120 - A 6.3, ISO 1174, with ball lock
- Square drive as per DIN 3120 - C 6.3, ISO 1174, with ball retention groove
- 2C reversible ratchet 1/4": lever for reversing clockwise/ anticlockwise direction, push-button release, fine-toothed, oval head, dual-material handle for ease in handling, for sockets
- Socket 1/4", hex: metric, short, as per DIN 3124, ISO 2725
- Socket extension 1/4"
- Sliding T-bar with slider 1/4": as per DIN 3122, ISO 3315
- Bit adaptor 1/4": with in-hex and female square, for all bits and tools with 1/4" external hex
- Chrome-vanadium steel, matt satin chrome-plated
- For hand-operated screw work
- Plastic case in GEDORE Red Design 190x110x52mm
- Clamp-secured tools
- Metal hinges/fastener

SPRAYERS

PROFESSIONAL QUALITY SPRAYERS

ATOMIZERS

- Atomizer sprayers come with an adjustable nozzle, making them ideal for spraying detergents, fertilisers, plant protection liquids, liquid waxes, insecticides, degreasers etc. Easy to use, practical and light, they are handy in everyday small jobs.

PART	DESCRIPTION	MIN. BUY	BOX QTY
G2002	1 Litre Atomizer Conico	23	23

HAND HELD PRESSURE SPRAYERS

- Hand held pressure pumps are ideal for spraying plant protection products and liquids in domestic situations. They have a free flow opening lever which stops the delivery when released. The pressure easily obtained with a few pumps of the shaft. Manufactured with high quality plastic.

PART	DESCRIPTION	MIN. BUY	BOX QTY
G4006	1.5 Litre	1	12
G4002	2 Litre	1	9

LARGE PRESSURE SPRAYERS

- The 5 and 10 litre sprayers come complete with shoulder straps and lance with adjustable nozzle. The sprayer also comes with a lance holder. Ideal for home or professional use.

PART	DESCRIPTION	MIN. BUY	BOX QTY
G4020SB	5 Litre	1	1
G4004SB	10 Litre	1	1

KNAPSACK – PROFESSIONAL

- The Rosy pressure sprayer comes with shoulder straps. The tank is manufactured from sturdy UV stabilised plastic. The absence of corners enables total discharge and avoids formation of residual deposits. The lance is telescopic with an adjustable nozzle, allowing access to hard to reach places.

PART	DESCRIPTION	MIN. BUY	BOX QTY
G3020SCL	Knapsack Sprayer 16L Rosy	1	1

SPRAYERS WITH VITON SEALS

- Sprayers fitted with viton seals will accommodate a broader range of chemicals. Please check with the chemical manufacturer to ensure that viton seals are suitable to use with the intended chemical.

PART	DESCRIPTION	MIN. BUY	BOX QTY
G4004SB-VT	10 Litre Sprayer fitted with Viton seals	1	1
G4002-VT	2 Litre Eva fitted with Viton seals	1	9

SPARE PARTS AND ACCESSORIES

KEY STEEL & SHIM

KEY STEEL

- 300mm lengths (sizes are clearly marked on each piece)
- Plated for rust prevention, metric is gold dichromated for easier identification.
- Most tolerances on dimensions are oversized to assure tight fits in keyways for positive, zero backlash power transmission.
- Imperial sizes are cold drawn low carbon C1018 steel and Metric sizes are cold drawn C1020 to C1045 steel.
- Stainless steel made from 303/304 grade.

SHIM PRODUCTS

- Precision Brand slotted shim is pre-cut, so you eliminate hand cutting, deburring and material waste.
- You are assured of quality because these shims are made of 300 series stainless steel that resists rust and corrosion. Precision Brand's thickness is so accurate you will save money through reduced labour costs because of faster, more precise alignment.
- The convenient tab design makes shim placement easier and safer. There's no need to put hands under machinery during installation or removal.
- Engineered for quality Precision Brand permanently marks each shim with the thickness and is the only leading shim manufacturer to guarantee thickness tolerances for its products.
- When you're aligning expensive machinery, don't settle for anything less than the very best – Precision Brand shim!

PRECISION BRAND steel shim stock is full hard, cold rolled low carbon 1008-1010. One roll per box.

LED PORTABLE WORK LIGHTS

SINGLE HEAD LED WORK LIGHT

L2400S

- Compact, light and cool to touch.
- IP rating 66
 - Dust tight.
 - Sealed against high pressure jets of water.
- Rugged die-cast aluminium housing.
- Durable polyester powder-coat finish.
- 2400 Lumens / CCT:5000k / white reflector /with spd 2.5KV
- Head can be adjusted quickly and without tools.
- Lextare LEDs rated 50,000 hours.
- 24W power consumption.
- 30x longer lifetime *(vs. Halogen life-1500 hour).
- 90% lower energy consumption *(vs. Equivalent 240W halogen light)
- Long 1.8m power cable

SINGLE HEAD LED RECHARGEABLE WORK LIGHT

L800SR

- Portable, light and cool to touch.
- 2 Hours run on full charge.
- IP rating 65
 - Dust tight.
 - Sealed against jetting water.
- Rugged die-cast aluminium housing.
- Durable polyester powder-coat finish.
- 800 Lumens / white reflector / neutral white colour temperature.
- Head can be adjusted quickly and without tools.
- Citizen LEDs rated 50,000 hours.
- 10W power consumption.
- 30x longer lifetime *(vs. Halogen life-1500 hour).
- 90% lower energy consumption *(vs. Equivalent 100W halogen light).
- Rechargeable lithium battery 2pcs/ package 2200mAH.
- 100-240V adaptor with DC jack.
