13	Load classification	8	

1 Spacing distance

Consideration must be given to the minimum distances required when setting groups of fixings to avoid failure of the building material. A factor of 3 times the setting depth must be used to achieve maximum loads.

2 Edge distance

Consideration must be given to the minimum edge distances to avoid failure of the building material.

3 Bending moment M

For some applications anchors are subjected to bending moments. For example, at a distance fixing.

4 Screw types

- ① Hexagon
- ② PZ2/3
- ③ T25/T30/T40
- ④ Hexagon, T40, collar

5 Torque

Force (F) x lever arm, measured at fulcrum, Nm = Newton meter
The anchor should be set using the recommended torque settings.

6 Installation torque

When the anchor is set using the correct torque a guaranteed fixing can be achieved.

7 Load directions

Tension (Z), Shear (Q), Combined (S)

8 Force

The force is indicated in Kilo-Newton (kN) / Newton (N)
1kN=1000N=100dN ≈ 100kg
10N=1dN ≈ 1kg

9 Setting data

h_{ef} : Effective anchorage depth
 h_0 : Drilling depth
 h_{min} : Minimum thickness of concrete member
 t_{fix} : Usable length

10 Breaking load

Failure of fixing (pt. 17)

11 Approved and recommended loads

Approved loads are those given in the corresponding approval. Working loads for products with European Technical Approval include a partial safety factor given by ETAG. Recommended loads are not always equal to approved loads. Recommended loads are determined under laboratory conditions and do not consider any influence of edge or centre distances.

12 Partial safety factor concept

13 Load classification

Static loads

Dynamic loads / Pulsating

Dynamic loads / Shock

Dynamic loads / Alternative

14 Methods of application

Through fixing

Pre installation

Distance fixing

15 Drilling process

Rotary drilling with wood drills and carbide drills: Drilling without percussion. Application: wood, plywood, particle board, wood fibreboard, gypsum plasterboard, fibreboard, aerated concrete, perforated brick.

Percussion drilling with carbide drills: Drilling at high speed with fast, short impacts. Application: brickwork made of solid blocks.

Hammer drilling with SDS-drills: Drilling at low speed with slow, strong impacts. Application: concrete and natural stone.

16 Setting pattern of insulation fixings

17 Modes of failure

Concrete failure

Steel failure

Anchor failure

18 Different anchor types

Torque controlled expansion anchors (e.g. m2, HL). Expansion achieved by application of torque.

Hammer set expansion anchor (e.g. MEA). Expansion is achieved by hammering a cone in the body of the anchor.

Nylon plug (e.g. MN, MQ, MU, MNA, ML, MQL, MB, MBR, MDD). Performance is achieved by the introduction of an expansion component which is screwed or driven into the anchor body. The anchor body is thus firmly blocked against the sides of the drilled hole.

Cavity wall anchor (e.g. MU, MHD-S). The head of the plug is pushed down onto the base material with the screw, and the anchor body is drawn against the interior of the base material by deformation.

Chemical anchor (e.g. MIT, MVA). The anchor consists of a fixing element (male or female rod) and a synthetic-based mortar. Manufactured from 2 components, hardener and resin which when mixed together create the chemical reaction, which hardens to create the fixing by bonding to the base material. Adhesive anchors do not generate stress in the building material.

Concrete Screw (e.g. MCS): The special thread of the anchor cuts an internal thread into the member while setting. The anchorage is characterised by mechanical interlock in the special thread, thus small edge and spacing distances and high loads.

19 Minimum setting depth

The indicated minimum setting depths may not be under-run. Non bearing layers such as plaster, flagstones, insulating materials etc. do not count as setting depths.

20 Fire protection

Fixings, for which fire rated anchors are required, Mungo offers a considerable range of metal anchors and MIT Injection Technique.

MQL/MB-S/MBR-S are approved for fixing of curtain walls without any restriction. The expansion part in the building material remains fire-resistant for at least 90 minutes.

21 Corrosion protection

Anchors made from galvanic zinc coated steel are used for fixings of fixtures indoors, with the exception of wet rooms. The thickness of the zinc coating is 5 microns. For external applications, wet rooms, areas of high humidity found in industrial atmospheres etc and locations in close proximity to the sea, require fixings of stainless steel A4 (1.4401 or 1.4571).

22 Concrete non-cracked/cracked

- 1 Compression strength: concrete non-cracked
- 2 Tensile strength: concrete cracked
- 3 Reinforcing steel

23 Nylon Quality PA6

Mungo nylon products are made from high-grade polyamide PA6. Due to its excellent characteristics PA6 can be described as the most valuable material in the fastening world.

- Large temperature range of -40°C up to +100°C
- Resistance to humidity maintains important technical features such as impact strength and low deformation risk
- Excellent stability in terms of dynamic loads
- Low flammability and self-extinguishing
- Halogen-free material

24 Deformation

The deformation characteristics of polyamide PA6 clearly offers better value in comparison to conventional materials.

25 Sound absorption

26 Solidity under temperature influences

27 Screw types

The following screw types can be used with Mungo nylon plugs:

28 Corrosion behavior in a salt spray test

29 Grades of steel

30 GreenTec® Corrosion resistant zinc alloy layer

GreenTec® is a special alloy layer system on a zinc and nickel foundation which provides hard, wear and tear resistant layers with a very high corrosion resistance, even with the lowest layer thicknesses. The layer system **GreenTec®** with its excellent metal distribution and constant alloy layer composition can be used for various purposes, given the right after care. Due to its excellent corrosion resistance,

GreenTec® is even used with the lowest layer thicknesses, especially for high quality purposes in the automobile hydraulic and electronic industry. The layer system provides further advantages through the hydrogen de-embrittlement of highly solid components without a loss of properties. Typical applications are coatings of connecting elements in the mid-cost area with corrosion and wear and tear requirements as well as high quality applications and applications in the high-tech industry. An important economic factor for the use of **GreenTec®** is the excellent extension of the durability in comparison with conventional zinc coatings which have a much lower layer thickness.

31 Zinc flake coating

Zinc flake coatings are non-electrolytically applied coatings, which provide good protection against corrosion. These coatings consist of a mixture of zinc and aluminium flakes. Further characteristics: uniform appearance, high protection against corrosion, chemical resistance and good friction characteristics.

50 years success

Your construction project will benefit from our experience

In 50 years Mungo has gained experience, technical know how and profound market knowledge. With these competences we are in a position to develop innovative and technically fully matured solutions. Creativity and innovation of our employees secure our market position in the future.

Worldwide market presence

Where building takes place

The head office and production facility in Olten is ideally located in central Switzerland, which offers advantages in our home country and, moreover, provides an ideal platform for distribution of our products to more than 52 countries worldwide.

The Milestones

- 1968 Mungo Befestigungstechnik AG Switzerland was established
- 1976 Foundation of Mungo Germany Stettenhofen
- 1977 Establishment of our worldwide distribution organisation
- 1980 New company build in Olten
- 2000 The fully automated high-bay warehouse has been commissioned
- 2003 Opening of the multi-stage cold forming plant in Olten
- 2003 Foundation of Mungo Italia in Padua
- 2004 Japanese honour for extraordinary product innovation
- 2005 Winner of the Solothurn Innovation Award
- 2009 Fully automated packaging machine has been commissioned
- 2011 Foundation of the establishment in Changsha, China
- 2015 Foundation of the establishment in Woodstock (GA), USA
- 2016 Olivier W. Annaheim, new CEO of Mungo Befestigungstechnik Ltd.
- 2016 Foundation of the establishment in Benelux
- 2018 50 years Mungo Befestigungstechnik AG Switzerland

High expertise in production

Nylon products production, injection moulding

Mungo nylon products are made from high-grade polyamide PA6. Due to its excellent characteristics PA6 can be described as the most valuable material in the fastening world.

Throughbolt production with cold forming techniques

For more than 48 years, Mungo has gained expertise in distribution and manufacturing of throughbolts. With our investment, we have established an important platform in cold forming techniques, which enables our company to play an important role in this worldwide market.

Our brand name

Attributes you can build on

The Mongoose, also known as a Mungo, inhabits South America, the Mediterranean coastline and Asia. This corresponds perfectly to Mungo's international reputation.

The Mungo is fast, mobile and resilient – similar characteristics to application friendliness, flexibility and maximum strength which distinguish our products.

The need to discover new technologies and applications is our commitment to the future.

Life as part of a community is natural for the Mungo, as it is for us being in constant contact with our customers, potential customers, colleagues and suppliers.

Mungo Design software

Download our design software
www.mungo.swiss/en/design-software.html

Available as a download

The advantages of Mungo Design software at a glance:

- User-friendly look and feel
- Optional user prompting and helpful reminders for missing information serve to reduce familiarisation time to a minimum
- The data can be edited either directly in the graphic or in the provided data fields
- Multilingual user interface
- Contact details of companies can be saved and reused
- Online updates: Quick and easy updates load automatically

Expert advice

Mungo has a strong presence - even on site

All those working with Mungo will enjoy the benefit of high quality products combined with expert advice from our field and in-house teams of sales and technical consultants, qualified engineers and product technicians.

Whether you need anchor calculations for a complex project or on site recommendations including pull out tests - we work together with you to define and optimise fixing solutions.

Quality assurance is a core competence

Consistent processes create satisfied customers

When it comes to quality, we do not compromise. SQS and IQNet certification demonstrates that Mungo operates an appropriate management system meeting the requirements of the international standards for quality management and quality assurance according to ISO 9001:2015. In addition to outside monitoring, in-house test, inspection equipment and laboratories ensure the safety and quality of the individual products. Optical gauging of the products with analysis in the SPC offers a reliable indication of the controlled and capable production process.

Comprehensive training courses for users

Learning and experience shared at team meetings

Mungo offers you full-day training courses on products and how to use them. Popular learning objectives include increasing efficiency or getting the most out of products. The training courses optimise users' economic viability and they increase the conscious use of technical advantages.

Training courses for post-installed rebar connections are in great demand. The course is led by experienced Mungo fastening experts. The course programme covers both theory, such as approvals, as well as practice with lots of helpful tips from the expert. Our professional user training provided by our specialists will prepare you for the Deutsches Institut für Bautechnik (DIBT - German Institute of Construction Technology) aptitude certificate.

Professional sales promotion

Together we succeed

With professional marketing tools and sales aids, we are able to support your company in sales, and help promote customer relationships with the brand image of Mungo.

Mungo references demonstrate top performance

Well equipped for the future

Mungo is a leading player in the development, manufacturing and distribution of high-quality fastening products that offer added value to professional customers in the construction industry and the building maintenance sector. Mungo's product range includes nylon plugs, metal anchors, chemical fixings, insulation fixings, drill bits and accessories.

Direct access to information about Mungo and its products

Give it a go

Download a free app onto your mobile, scan the QR Code on the Mungo boxes and outer carton labels and you will have easy and quick access on mobile devices to all product information.

Your perfect partner

Professional partner in the fastening industry

Formed in 1968, Mungo has developed into a medium-sized enterprise with a worldwide customer base and has secured a firm position as a professional partner in the fastening industry. This is due to its consistent enhancements of its product range and the active expansion of its presence on the international market.

m2 Throughbolt

Features

- European Technical Approval Option 7 for non-cracked concrete
- GreenTec® corrosion protection - Extra long lasting
- Advanced corrosion resistance ≥ 750 hours in salt spray test
- Higher loads, higher security
- Improved clip design; higher loads and best expansion
- High-quality and stainless steel appearance
- Small edge and spacing distances
- Highest shear loads and bending moment for safe distance fixing
- Setting depth mark for correct installation
- Simple setting process due to low resistance to impacts
- Fast achievement of installation torque
- GreenTec® coating
- Pre installation or through fixing
- Indoor applications and unweathered outdoor applications

Applications

steel constructions, profiles, machines, high-racks, cable trays

GreenTec®

Option 7

Technical Data

	Concrete C20/25 tension load (kN)	Concrete C20/25 shear load (kN)	Bending moment (Nm)	Min. distance betw. anchors/ at edge distance mm s_{min}/c	Min. edge distance/at distance betw. anchors mm c_{min}/s	Minimum thickness of concrete member mm h_{min}	Installation torque (Nm) T_{inst}	Wrench size SW
M6	3.6	2.1	5.7	40/70	40/80	100	5	10
M8	5.7	6.1	14.9	45/45	45/45	100	15	13

m2-c Throughbolt

Features

- European Technical Approval Option 7 for non-cracked concrete
- Higher loads, higher security
- Improved clip design; higher loads and best expansion
- With a big DIN 9021 washer for fixings with slotted holes and for wooden structures
- Small edge and spacing distances
- Highest shear loads and bending moment for safe distance fixing
- Setting depth mark for correct installation
- Simple setting process due to low resistance to impacts
- Fast achievement of installation torque
- Zinc plated > 5µm
- Pre installation or through fixing
- Indoor applications

Applications

wooden constructions, distance fixing

m2f Throughbolt, hot dip galvanised

Features

- Higher loads, higher security
- Improved clip design; higher loads and best expansion
- Torque controlled expansion
- Small edge and spacing distances
- Highest shear loads and bending moment for safe distance fixing
- Setting depth mark for correct installation
- Simple setting process due to low resistance to impacts
- Fast achievement of installation torque
- Hot dip galvanised > 40µm
- Pre installation or through fixing
- Indoor and outdoor applications

Applications

cable trays, railings, steel constructions, machines, high-racks, profiles

m2-I Internally Threaded Bolt

Features

- Higher loads, higher security
- Improved clip design; higher loads and best expansion
- Suitable for metric screws and rods
- Zinc plated > 5µm
- Stainless steel A4/316
- Pre installation
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

pipes, ventilation systems, substructures, wooden structures

HL Heavy Duty Anchor

Features

- European Technical Approval Option 1 for cracked and non-cracked concrete
- ICC-ES Report ESR-3137
- Fire resistance test certification F30-F120
- Approved for use with fixed water sprinkler systems from M8 to M20
- Shock proof fastening in civil defence projects
- Torque controlled expansion
- Zinc plated > 5µm
- Through fixing
- Indoor applications

Applications

machines, cable trays, pipes, gates, substructures, railings

HL-SK (SZ-SK) Heavy Duty Anchor with countersunk head

Features

- European Technical Assessment Option 1 for cracked and non-cracked concrete
- ETAG 001 - 06 - Approved for multiple use in cracked and non-cracked concrete for non-structural applications
- Fire resistance up to F120 is part of the approval
- The anchor may also be used under seismic influence for performance category C1 (h_{nom}3: Ø 8, 10, 12, 14)
- User-friendly, time-saving installation
- 3 Setting depths
- Allows adjustment or dismantling
- All possible head version in range
- Small edge and spacing distances
- High loads
- Guarantees a clean and uniform appearance
- Through fixing
- Indoor applications

Applications

railings, hand-rails, consoles, profiles, substructures, steel constructions, wooden constructions, ventilation systems, pipes, high-racks

M8-M10European Technical Assessment Option 1 for cracked and non-cracked concrete ($\geq 6 \times 50$)ETAG 001 - 06 - Approved for multiple use in cracked and non-cracked concrete for non-structural applications ($\varnothing 5 + 6$)

MCSr Concrete Screw, stainless steel A4/316

Features

- European Technical Assessment Option 1 for cracked and non-cracked concrete
- ETAG 001 - 06 - Approved for multiple use in cracked and non-cracked concrete for non-structural applications
- Fire resistance up to F120 is part of the approval
- The anchor may also be used under seismic influence for performance category C1 (h_{nom}3: Ø 8, 10, 12, 14)
- User-friendly, time-saving installation
- 3 Setting depths
- Allows adjustment or dismantling
- All possible head version in range
- Small edge and spacing distances
- High loads
- Guarantees a clean and uniform appearance
- Through fixing
- Outdoor applications

Applications

railings, hand-rails, consoles, profiles, substructures, steel constructions, wooden constructions, ventilation systems, pipes, high-racks

MEA Drop in Anchor

Features

- European Technical Approval Option 7 for non-cracked concrete
- ETAG 001 - 06 - Approved for multiple use in cracked and non-cracked concrete for non-structural applications
- Fire resistance up to F120 is part of the approval
- Use in reinforced or non reinforced concrete
- Suitable for metric screws and rods
- Quick and simple installation
- Low edge and anchor distances
- Short drilling depth
- Zinc plated > 5µm
- Stainless steel A4/316
- Pre installation

Applications

pipes, ventilation systems, cable trays

MMD Brass Anchor

Features

- Corrosion resistant
- Pre installation
- For light applications indoor and outdoor

Applications

substructures, rails

Technical Data

MAN Ceiling Anchor

Features

- Approved for multiple fixings of light weight suspended ceilings according to DIN 18168, also in cracked concrete
- Fire resistance up to F120 is part of the approval
- Suitable for overhead fixings
- Simple setting process by flush hitting of overlaying pin
- For fast to install ceiling systems
- Head of ceiling anchor rests wide and covers neatly
- Top load values
- Zinc plated > 5µm / Stainless steel A4/316
- Through fixing
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

suspended ceilings, wire hanger, substructures, profiles, ventilation systems

Technical Data

	Concrete C20/25 - C50/60 tension load (kN)	Bending moment (Nm)	Min. distance between anchors mm	Min. edge distance mm	Minimum thickness of concrete member mm
MAN	1.4	3.0	s_{min}	c_{min}	h_{min}
MANr	1.43	-	200	150	80
			200	100	80

The partial safety factors of the resistances as well as a partial safety factor of the load of $\gamma_F = 1.4$ are considered / 1 kN $\approx$ 100 kg

Installation

MRS Wall Screw

Features

- Only 6mm pre-drilling required
- User-friendly, time-saving installation
- Small edge and spacing distances
- Stress-free fastening
- Low torque required
- Also suitable for wood-wood connection
- Zinc plated > 5µm
- Through fixing
- Indoor applications

Applications

wooden constructions, windows, frames

TR-RK Frame Fixing Screw Rafix-K with collar

TR Spacer Screw Toproc

Features

- In combination with Nylon Plug MN6/MN8 (TR, TR-B)
- Ideal for hidden installations
- Hexagon socket 4mm
- Zinc plated > 5µm
- Through fixing
- Indoor applications

Applications

substructures, frames

Technical Data

	Concrete C20/25 tension load (kN)	Perforated Brick tension load (kN)	Wood tension load (kN)
TR	1.67	0.63	1.27
TR-B	1.57	0.63	-
TR-BS	1.57	0.63	-

1 kN ≈ 100 kg / Safety factor of 3 is included

MIT-Hybrid Mortar for highest performance in concrete

Features

- European Technical Approval Option 1 for cracked and non-cracked concrete with anchor rod and with rebar used as anchor
- European Technical Approval for post-installed rebar connections
- The anchor may also be used under seismic influence for performance category C1 + C2
- Fire resistance test certification F30-F240 (Rebar)
- VOC free according to Swiss legislation and certified A+ according to DEVL 1101903D / DEVL 1104875A
- LEED - Test Report
- Certification for drinking water systems
- High loads
- Fast curing
- Variable setting depth
- Dry and damp drill holes
- Suitable for overhead fixings
- Styrene free and low odour
- Colour of mortar: grey
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

steel constructions, wooden constructions, façades, façade scaffolds, railings, high-racks, machines, staircases, ladders, cable trays, canopies, hand-rails, consoles

Temperatures

	-5÷+1°C	0÷+4°C	5÷+9°C	10÷+14°C	15÷+19°C	20÷+29°C	30÷+40°C

MIT60ORE Pure Epoxy for highest loads in concrete

Features

- European Technical Approval Option 1 for cracked and non-cracked concrete with anchor rod and with rebar used as anchor
- European Technical Approval Option 7 for diamond drilled holes in non-cracked concrete
- European Technical Approval for post-installed rebar connections
- German National Approval for post-installed rebar connections
- ICC-ES Report ESR-3411
- Fire resistance test certification F30-F120
- Fire resistance test certification F30-F240 (Rebar)
- VOC free according to Swiss legislation and certified A+ according to DEVL 1101903D / DEVL 1104875A
- LEED - Test Report
- Certification for drinking water systems
- The anchor may also be used under seismic influence for performance category C1 + C2 (M12-M30)
- High loads
- Long working time for filling of big and deep drill holes
- Variable setting depth
- Application also in damp and water-filled drill holes
- Suitable for overhead fixings
- Shelf life: 24 months
- Colour of mortar: grey
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

post-installed rebar connections, steel constructions, profiles, closing of ceilings, repair works

Temperatures

	5+9°C	10+19°C	20+29°C	30+39°C	≥ +40°C

MIT-SE Plus Mortar for use in concrete

Features

- European Technical Approval Option 1 for cracked and non-cracked concrete with anchor rod and with rebar used as anchor
- European Technical Approval according to ETAG 029 for use in masonry
- European Technical Approval for post-installed rebar connections
- German National Approval for post-installed rebar connections
- ICC-ES Report ESR-3410
- Fire resistance test certification F30-F120
- Fire resistance test certification F30-F240 (Rebar)
- VOC free according to Swiss legislation and certified A+ according to DEVL 1101903D / DEVL 1104875A
- LEED - Test Report
- Certification for drinking water systems
- The anchor may also be used under seismic influence for performance category C1
- Universal mortar for highest loads in almost all building materials
- Fast curing
- Variable setting depth
- Application also in damp and water-filled drill holes
- Suitable for overhead fixings
- Styrene free and low odour
- Colour of mortar: grey
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

post-installed rebar connections, steel constructions, wooden constructions, façades, façade scaffolds, railings, high-racks, machines, staircases, ladders, cable trays, canopies, hand-rails, consoles

Temperatures

	-10÷-6°C	-5÷-1°C	0÷4°C	5÷9°C	10÷19°C	20÷29°C	30÷34°C	35÷39°C	>40°C

MIT-SP Mortar for use in masonry

Features

- European Technical Approval according to ETAG 029 for use in masonry
- European Technical Approval Option 7 for non-cracked concrete with anchor rod and with rebar used as anchor
- VOC free according to Swiss legislation and certified A+ according to DEVL 1101903D / DEVL 1104875A
- LEED - Test Report
- Suitable for assemblies in perforated brick with sleeve
- Medium duty fastening
- Fast curing
- Variable setting depth in concrete
- Dry, damp and water-filled drill holes
- Styrene free and low odour
- Colour of mortar: grey
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

light steel constructions, frames, gates, light duty applications, façades, consoles

Temperatures

	-5÷-1°C	0÷4°C	5÷9°C	10÷14°C	15÷19°C	20÷29°C	30÷34°C	35÷39°C

MIT-Rock Mortar for use in natural stone

Features

- Optimum long term behaviour
- For use in natural stone
- Resistant against acid and solvents
- Stress-free fastening
- Low edge and anchor distances
- Medium duty fastening
- Fast curing
- Fixed setting depth
- Application also in damp drill holes
- Colour of mortar: dark grey
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

steel constructions, wooden constructions, façades, façade scaffolds

Temperatures

	≥ +5°C	≥ +10°C	≥ +20°C	≥ +30°C	≥ +35°C
Working time, in minutes (t_{gel})	25	15	6	4	2

MIT-COOL Plus Mortar for low temperatures

Features

- European Technical Approval Option 1 for cracked and non-cracked concrete with anchor rod and with rebar used as anchor (-20°C - +10°C)
- European Technical Approval according to ETAG 029 for use in masonry
- VOC free according to Swiss legislation and certified A+ according to DEVL 1101903D / DEVL 1104875A
- LEED - Test Report
- Fire resistance up to F120 is part of the approval
- The anchor may also be used under seismic influence for performance category C1
- Certification for drinking water systems
- Stress-free fastening
- High loads
- Fast curing
- Variable setting depth
- Application also in damp and water-filled drill holes
- Suitable for overhead fixings

MIT-Tropical Mortar for high temperatures

Option 7

Applications

steel constructions, wooden constructions, façades, façade scaffolds, railings, high-racks, machines, staircases, ladders, cable trays, canopies, hand-rails, consoles

Temperatures

	10+14°C	15+19°C	20+29°C	30+34°C	35+39°C	40+44°C	>45°C
Working time, in minutes (t_{gel})	30	20	15	10	6	4	2
Curing time, in minutes (t_{cure})	300	210	145	80	45	25	20

Installation

Features

- European Technical Approval Option 7 for non-cracked concrete (10°C - ≥+45°C)
- Medium duty fastening
- Slow curing
- Variable setting depth
- Application also in damp and water-filled drill holes
- Styrene free and low odour
- Colour of mortar: grey
- Indoor (zinc plated) and outdoor (stainless steel) applications

Technical Data

	Concrete C20/25 tension load (kN)
MIT-ESH	5.0

with MIT-SE Plus / * For applications with MIT600RE please consult your local Mungo application engineer / Safety factor of 2.5 is included / 1 kN $\approx$ 100 kg**Installation**

MVA Resin Capsule

Features

- European Technical Approval Option 8 for non-cracked concrete
- Quick and simple installation
- Small edge and spacing distances
- Temperature range short term: -40°C - $+80^{\circ}\text{C}$
- Temperature range long term: -40°C - $+50^{\circ}\text{C}$
- Anchor rod with 45° end
- Setting depth mark for correct installation
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

steel constructions, cable trays, guard rails, substructures, machines

MPU-P50/B1 Fire Rated Dispenser Foam, up to 50 litres yield

Features

- Class B1 according to DIN 4102-1
- Fire resistance up to 240 minutes; EI240 according to EN 13501-2
- Flame resistant B1 (DIN 4102)
- Emission EC1^{Plus} - very low emission
- Special formula for high fire resistance
- Application in environments where high fire resistance is required, such as public buildings, hospitals, industrial buildings, etc.
- Rapid curing, reduces the processing time
- High yield up to 50 litres

Applications

filling and sealing of cavities, air spaces and joints, fixing of fireproof door frames, sealing of pipe crossings in plumbing, cooling and air conditioning, sealing and insulation of pipes penetrating walls

Technical Data

	Tack-free time in min.	Cutting time in min.	Full cure time in h
MPU-P50/B1	6-9	25-35	24

At a temperature +20°C and humidity of 50% (30mm line)

MPU-M50 Hand Held PU Foam,
up to 50 litres yield

MPU-P40/AS Gun Soft Foam, 45 litres

Features

- Class B2 according to DIN 4102
- Class E according to EN 13501-1
- Emission EC1 Plus - very low emission
- Premium quality gun soft foam is a special soft cell foam which due to its elasticity, can permanently accommodate significant component movements, e.g. due to temperature fluctuations
- All seasons
- Optimum results at low temperatures down to - 10°C
- Permanent high elasticity
- Fast curing
- High yield up to 45 litres

Applications

window installation (clean, controlled back-filling, insulating and sealing joints in window and external roller blinds)

Technical Data

	Tack-free time in min.	Cutting time in min.	Full cure time in h

MPU-PS50 Dispenser Foam for concrete formwork, up to 50 litres yield

Features

- Is suitable for sealing of joints and connectors in concrete formwork as well as for integrating recesses into areas to be filled with concrete
- Simple and speedy working
- Resistant to decay
- High yield up to 50 litres

Applications

use for sealing leaks in concrete formwork, integration of recesses into areas not to be covered with concrete, fixation of loose parts prior to pouring concrete

Technical Data

	Tack-free time in min.	Cutting time in min.	Full cure time in h
MPU-PS50	6-9	40-45	24

MPU-PS50 Dispenser Foam for concrete formwork, up to 50 litres yield

MPU-PP Perifix Gun Grade Perimeter Adhesive

Features

- MPU-PP Perifix is a ready to use one component polyurethane adhesive for bonding of perimeter insulation panels
- Simple and speedy working
- Strong initial tack
- High level of adhesion
- Excellent adhesion to many common building substrates; such as concrete, masonry, stone, plaster, wood, fibre cement, metal and many plastics
- Resistant to decay
- Excellent insulating properties
- Class F according to EN 13501-1 (B3)
- High yield (up to 12 m² panels)

Applications

bonding of perimeter panels in the outdoor environment for insulation and structural protection, filling and patching of voids between panels

Technical Data

	Adhesive open time, in minutes	Curing time in h	Full cure time in h
MPU-PP Perifix	6	3-5	24

- Features**
- Suitable for cleaning objects stained with polyurethane foam, tools, foam dispenser and foam cans

MRM-PU Cleaner for PU-Foam and dispenser

Article code	Description	Content	Box content	Quantity per pallet
1713521	for PU-Foam/dispenser	500	12	780

MPP-M Metal dispenser

Article code	Description	Box content
1713522	for PU-Foam	1

MPP-K Nylon/Metal dispenser

Article code	Description	Box content
1713523	for PU-Foam	1

MSI-NP Silicone

Features

- Universal use
- Non-corrosive
- Fungus-inhibiting
- UV resistant, weather proof and non-ageing
- With adhesion promoter
- Polysiloxane base
- Indoor and outdoor applications

Applications

sanitary places, joints around windows, connection joints

Article code	Colour	Content	Box content	Quantity per pallet
1712531	transparent	310	24	1440
1712532	white	310	24	1440

MSI-NP Neutral Silicone, fungus-inhibiting

MDA Acrylic Sealant

Features

- The sealant hardens by means of water evaporation
- Acrylic dispersion base
- Low odour, suitable for indoor applications
- Paintable
- UV resistant, weather proof and non-ageing

Applications

joints in interior and exterior areas, joints with little movement

MDA Acrylic Sealant

Article code	Colour	Content	Box content	Quantity per pallet
1712562	white	310	24	1440

MMK-U Universal Adhesive

Features

- Very high initial tack
- Class B2 according to DIN 4102
- High level of adhesion
- Permanently elastic
- Fungus-inhibiting
- UV resistant, weather proof and non-ageing
- With adhesion promoter

Applications

universal use, structural elastic bonding in the building and metal working industry, bonding of window sills and panels, suitable for sanitary applications

Article code	Colour	Content	Box content	Quantity per pallet
1712536	grey	290	12	1560
1712538	transparent	290	12	1560

MN Nylon Plug

Applications

pictures, lamps, holders, profiles, substructures, electric switches, rails

Features

- Can be used with wood screws, chipboard screws and metric screws
- Suitable for use in most kinds of building materials, especially in solid building materials
- Knock-in protection prevents premature expansion while installing
- Holds the plug firm in the hole against rotation; guarantees immediate grip as the plug expands
- M-Teeth ensuring a complete radial expansion during screw insertion
- Prevent the plug from breaking open while inserting into the hole
- Made from high-quality polyamide PA6
- Pre installation or through fixing
- Indoor and outdoor applications

MQ Quattro® Nylon Plug

Applications

holders, electric switches, pictures, lamps, profiles, substructures, rails

Features

- Quattro® Technology
- Highest possible retaining values in the lower and middle load area, particularly suitable for applications with chipboard screws
- For use in all kinds of building materials
- Collar prevents the plug from being pushed into deeper holes
- Knock-in protection prevents premature expansion while installing
- Rotation resistance stops the plug rotating in the drill hole
- Special plug geometry allows ease of entry into the drill hole
- Made from high-quality polyamide PA6
- Pre installation
- Indoor and outdoor applications

MU Multi Plug Nylon

Applications

holders, electric switches, rails, pictures, lamps, substructures, profiles

Features

- The knot leads to high performance in hollow walls
- Can be used with wood screws, chipboard screws and metric screws
- Automatic collar detachment makes the plug multifunctional
- Knock-in protection prevents premature expansion while installing
- Self tensioning stops the plug rotating in the drill hole
- Made from high-quality polyamide PA6
- Pre installation or through fixing
- Indoor and outdoor applications

ML Hollow Brick Plug

Features

- Ideal for use in brickwork
- Can be used with wood screws, chipboard screws and metric screws
- For use with anchor rod M10 (ML14)
- Special plug end geometry, ML6 and ML8, causes a knotting of the plug shanks
- Rotation resistance stops the plug rotating in the drill hole
- Knock-in protection prevents premature expansion while installing
- Collar prevents the plug from being pushed into deeper holes (MLK)
- Made from high-quality polyamide PA6
- Pre installation or through fixing
- Indoor and outdoor applications

Applications

facings, squared timbers, roller blinds (only MLK), frames, distance fixing

Technical Data

	Perforated Brick tension load (kN)	Lightweight Concrete tension load (kN)
ML 6	0.4	0.15
ML/MLK 8	0.6	0.25

SD Sound Insulation Plug

Features

- Greatly reduced sound transmission once installed, due to integrated plug
- Sound reduction up to 15.5 dB (structure-borne noise), tested by IFB, Mülheim
- Can be used with most types of wood screws
- Integrated MN Nylon Plug made from polyamide 6
- Pre installation or through fixing (SD)
- Pre installation (SDK)
- Indoor and outdoor applications

Applications

substructures, sound insulation constructions, cable clips, pipe clips

Technical Data

SDK Sound Insulation Plug with collar

MNA Hammer Screw

Applications

wooden constructions, skirtings, profiles, frames

Features

- Quick and simple installation
- Available with 3 different styles of head
- The long expansion zone guarantees optimum stability
- Easy and reliable installation
- The buttress thread allows adjustment or dismantling
- Plug made from high-quality polyamide PA6
- Through fixing
- Indoor (zinc plated) and outdoor (stainless steel) applications

MNAF Hammer Screw for skirting board fixing

Features

- Coloured nails are resistant to chipping when hammered
- Detachable pozi-drive-nailhead
- The long expansion zone guarantees optimum stability
- Easy and reliable installation
- The buttress thread allows adjustment or dismantling
- Plug made from high-quality polyamide PA6
- Through fixing
- Indoor applications

Applications

skirtings, profiles

MNAF Hammer Screw for skirting board fixing, dark brown

MQL Universal Nylon Frame Plug

Features

- ETAG 020 - Approved for multiple use in concrete and masonry for non-structural applications
- Fire resistance test certification F90 for fastening of façade systems
- Quattro® Technology
- Increased load capacity due to 4 expansion zones
- Universal use
- Setting depth of 70mm results in higher loadings
- Knot forming leads to high resistance in cavities
- Longer plugs with reinforced shank
- 3-times rotation resistance stops the plug rotating in the drill hole (especially in softer materials)
- Knock-in protection prevents premature expansion while installing
- Oversize plugs moulded in one-piece up to the overall length of 300mm
- Made from high-quality polyamide PA6
- Through fixing
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

façade and roof substructures, ventilated façades, fixing for insulation, substructures, profiles

MB Nylon Frame Plug for softer materials

Features

- ETAG 020 - Approved for multiple use in concrete and masonry for non-structural applications
- Fire resistance test certification F90 for fastening of façade systems
- Approved and suitable for applications in perforated brick, masonry and aerated concrete
- Aerated Concrete: Drill-Ø 9mm, setting depth 90mm
- MB with extended expansion zone for optimum applications in low density materials and hollow brick
- Knock-in protection prevents premature expansion while installing
- Wings stop the plug rotating in the drill hole
- Oversize plugs moulded in one-piece up to the overall length of 300mm
- Plug made from high-quality polyamide PA6
- Through fixing
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

façade fixings, profiles, substructures, frames

Technical Data

	Perforated Brick app. load (kN)	Lightweight Concrete app. load (kN)	Aerated Concrete app. load (kN)	Bending moment (Nm) galv. steel	Bending moment (Nm) stainl. steel
MB 8	¹⁾ 0.3	¹⁾ 0.4	¹⁾ 0.3	¹⁾ 3.4	¹⁾ 3.2
MB 10	0.3	0.5	¹⁾ 0.3	¹⁾ 11.1	¹⁾ 10.4

Important: Recommended loads / The approved loads and detailed specifications of stones can be found in the approval ETA-15/0068 / Approved loads: Tension, shear and combined loads / without hammer drilling in perforated brick and lightweight concrete / 1 kN ≈ 100 kg / Safety factor of 2.5 is included / Values only valid when using Mungo safety screws / 1) Mungo lab tested

MB-SK Nylon Frame Plug with head hole

Features

- With head hole MN5 (screwtype wood/chipboard) or M5 (screwtype metric)
- Suitable for light duty insulation applications
- MB with extended expansion zone for optimum applications in low density materials and hollow brick
- Knock-in protection prevents premature expansion while installing
- Wings stop the plug rotating in the drill hole
- Universal use
- Plug made from high-quality polyamide PA6
- Through fixing

Applications

thermal insulation on façades, lamps, roller blinds, rails, wardrobes, letter boxes

Technical Data

	Perforated Brick tension load (kN)	Lightweight Concrete tension load (kN)	Aerated Concrete tension load (kN)	Head hole tension load (kN) screw Ø 4mm	Head hole shear load (kN) screw: steel quality 4.6
MB-SK 10	0.25	0.25	0.25	0.1	-
MB-SKm 10	0.25	0.25	0.25	-	1.68

without hammer drilling in perforated brick and lightweight concrete / Safety factor (ground) of 5 is included / Safety factor (head hole) of 2 is included / Shear load: without consideration of edge and anchor distances / 1 kN ≈ 100 kg

MBR Nylon Frame Plug for solid materials

Features

- ETAG 020 - Approved for multiple use in concrete and masonry for non-structural applications
- Fire resistance test certification F90 for fastening of façade systems
- Approved and particularly suitable for applications in solid materials
- Knock-in protection prevents premature expansion while installing
- Less drilling - faster installation
- MBR with an expansion zone of 50mm for a faster installation
- Helps to avoid cold transmission and contact corrosion between different materials
- Wings stop the plug rotating in the drill hole
- Plug made from high-quality polyamide PA6
- Through fixing
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

façade fixings, profiles, substructures, frames

Technical Data

	Concrete $\geq$ C12/15 app. load (kN)	Sandstone app. load (kN)	Brick app. load (kN)	Bending moment (Nm) galv. steel	Bending moment (Nm) stainl. steel

MBR-SK Nylon Frame Plug with head hole

Features

- With head hole MN5 (screwtype wood/chipboard) or M5 (screwtype metric)
- Suitable for light duty insulation applications
- Knock-in protection prevents premature expansion while installing
- Less drilling - faster installation
- MBR with an expansion zone of 50mm for a faster installation
- Wings stop the plug rotating in the drill hole
- Universal use
- Plug made from high-quality polyamide PA6
- Through fixing

Applications

thermal insulation on façades, lamps, roller blinds, rails, wardrobes, letter boxes

Technical Data

MBR-X High Performance Frame Plug

Features

- Particularly suitable for applications in solid materials and perforated brick
- Knock-in protection prevents premature expansion while installing
- High loads
- Less drilling - faster installation
- MBR-X with an expansion zone of 50mm for a faster installation
- Increased bending moment due to HT-screw with a larger screw diameter
- Wings stop the plug rotating in the drill hole
- Helps to avoid cold transmission and contact corrosion between different materials
- Plug made from high-quality polyamide PA6
- Through fixing
- Indoor (zinc plated) and outdoor (stainless steel) applications

Applications

façade fixings, profiles, substructures, frames

MGD Scaffold Plug

Applications

façade scaffolds, climbing scaffolds, tensioning ropes

Features

- Economical solution for light scaffolds
- Welded screw for safe fixing according to DIN 4420
- Tension force of eyelet: 26 kN (DIN EN 10002-1: 1991-04)
- Setting depth mark for correct installation
- Easy installation due to knock-in protection and plug collar
- End Cap for clean closure after dismantling
- Plug made from high-quality polyamide PA6
- Temporary outdoor applications

Technical Data

	Non-cracked concrete C20/25 tension load (kN)		Brick tension load (kN)	Perforated Brick tension load (kN)

MDD-S Insulation Fixing, steel nail

Features

- European Technical Approval according to ETAG 014 - A, B, C
- Examined according to ÖNORM B6124 and fulfills all requirements for the use in categories A, C
- For the fixings of ETICS
- Fixing system consisting of expansion plug with retaining disc (Ø 60mm) and expansion nail with special head
- In combination with MDD-VZ discs for soft insulating material
- Special head type prevents unnecessary leakage of heat and offers additional corrosion protection
- The special disc profile allows optimum adhesion of plaster
- Suitable for insulation thicknesses up to 270 mm
- Short setting depth
- Shock resistant material
- For overhead applications please consult your local Mungo application engineer
- Through fixing

Applications

pressure-resistant insulating materials, soft insulating materials, thermal insulation composite systems with rendering

Technical Data

MDD-VZ Disc for MDD-S, MDD-CE

MDD-CE Insulation Fixing, plastic nail

Features

- European Technical Approval according to ETAG 014 - A, B, C, D, E
- For the fixings of ETICS
- Fixing system consisting of expansion plug with retaining disc (Ø 60mm) and expansion nail with special head
- In combination with MDD-VZ discs for soft insulating material
- Shock resistant material
- With glass-fibre reinforced plastic pin
- Stable against influences of the weather
- Resistant to cold and heat
- For overhead applications please consult your local Mungo application engineer
- Through fixing

Applications

pressure-resistant insulating materials, polyurethane rigid foam panels, polystyrenes, mineral wools

MDS Insulation Fixing, Ø 90 mm

MIS Insulation Fixing for lightweight panel

Features

- Large star shaped plug head for soft insulation boards
- Low reduction of insulation level
- Shock resistant material
- Reduced installation time, without screws and nails
- For overhead applications please consult your local Mungo application engineer
- Through fixing

Applications

soft insulating materials, glass wools, wood-wool building slabs, mineral wools

MIP Insulation Fixing for mineral wool

Applications

pressure-resistant insulating materials, polyurethane rigid foam panels, polystyrenes

Features

- Provides optimal bonding conditions for plaster
- Low reduction of insulation level
- Shock resistant material
- Reduced installation time, without screws and nails
- For overhead applications please consult your local Mungo application engineer
- Through fixing

MIDS Insulation Nail

Features

- MIDS: Fire resistance test certification F120
- Cap reduces thermal transmission
- In combination with MDB discs for soft insulating material
- Stainless steel for outdoor applications
- Suitable for overhead fixings
- Through fixing

Applications

soft insulating materials, pressure-resistant insulating materials, mineral wools, glass wools, wood-wool building slabs

1180527	8	300	270	-	260	54	80	3840

Features

- Fixing in ETICS, polystyrene boards and polyurethane foam panels
- Top load values
- Quick and simple installation
- No pressure load on the façade
- Usually without pre-drilling
- Low reduction of insulation level
- Made from high-quality polyamide PA6
- Pre installation
- Indoor and outdoor applications

Applications

lamps, electric switches, letter boxes, rails, pictures, holders

MJP Jet Plug metal

Features

- MJP39 - For single, double drywall, plasterboard and gypsum fibre board
- MJP32 - For single, double drywall, plasterboard, gypsum fibre board and reduced cavities
- MJP25 - For single plasterboard and reduced cavities where the point breaks off
- Thin cutting thread; easy and reliable installation in drywall
- Back twist lock permits the disassembly of screws without the movement of the plug
- Center point ensures an easy setting and drilling in the plate
- Metric thread for use with pipe clips
- Pre installation
- Indoor applications

Applications

lamps, pictures, rails, skirtings, small wall-mounted shelves

MF-H Cavity Toggle with hook**MK** Cavity Toggle**Features**

- With threaded rod (-M) or hook (-H)
- A large contact area for soft base materials
- Through fixing
- Indoor applications

**Applications**

suspended ceilings, cable trays, lightweight mirror cabinets, rails

**Technical Data**

	Plasterboard d = 12.5mm tension load (N)	Chipboard d = 13mm tension load (N)	Cement fiber board d = 12mm tension load (N)	MK-H (Hook deformation) (N)
MK M5	230	400	650	200
MK M6	250	450	700	250
MK M8	300	500	750	350
MK M10	330	770	920	-

Safety factor of 3 is included / 10 N $\approx$ 1 kg / Values are dependent on base materials

jet-trac triplo Drill Bit, SDS-Plus, 3-cutter**Features**

- Hammer drilling
- Reliable - Long Life - Robust
- Monobloc tip with 3 cutting edges for drilling in all types of concrete
- No jamming with reinforcement hits
- Drill holes suitable for plugs and anchors throughout the life of the drill bit
- 3 simultaneous contact points provide consistently high drilling performance
- The self-centering tip gives higher drill precision
- The 135° angle carbide tip achieves clean and perfect holes without cracking the concrete
- The square flute accelerates dust extraction and improves the drill bit lifetime
- High durability even in the hardest materials

jet-trac turbo Drill Bit, SDS-Plus, 2-cutter**Features**

- Hammer drilling
- Use in non reinforced building materials
- Aggressive rake and varying relief angle for high speed drilling
- Flat and fully supported head for long life and to maximise support and speed
- Optimised helix angle flute maximises both volume and energy
- Optimum extraction of drill dust promotes high drilling performance

SDS-Max Drill Bit, SDS-Max, 6-cutter

Features

- Hammer drilling
- Robust - Long Life - Precision - Speed
- 6 asymmetric cutting edges reduce the risk of blockage
- No jamming with reinforcement hits
- Drill holes suitable for plugs and anchors throughout the life of the drill bit
- The self-centering tip gives higher drill precision
- High flexural resistance due to the progressively increasing core diameter of the drill bit
- Optimum extraction of drill dust promotes high drilling performance
- Long lifespan

MAB Allmat Drill Bit

Features

- Rotary drilling
- Performant, resistant and accurate
- Carbide tip 118°
- The self-centering tip gives higher drill precision
- 4 sharpened edges, S-shaped
- Cylindrical
- Universal use
- Clean and accurate holes
- Optimum extraction of drill dust promotes high drilling performance

MAB Allmat Drill Bit

MPM SDS-Plus Chisel

- Features**
- Long life
 - Anti-lock
 - Effortless chiseling and faster penetration
 - All possible head version in range
 - 100% Powerful
 - Due to its helical head, the pointed chisel penetrates and easily exposes most materials

BIT-SET Set (19 pcs)

MPC Pro Cut Cutting Disc, 1.0 - 1.9

Features

- Cutting
- Profi cutting discs for fast and comfortable operations
- Discs fulfill highest requirements of work safety
- High performance and long life
- Burr free cutting reduces post-cut operation
- Latest developments of grain and bonding technology
- Free of iron, sulphur and chlorine (prevents contamination of stainless steel material)

Applications

for cutting sheets, small diameter profiles and bars, optimised for cutting steel and stainless steel

MPC Pro Cut Cutting Disc, 1.0 - 1.9

Article code	Ø mm d	Thickness mm H	Inside Ø mm d _i	Box content

MPC Pro Cut Cutting Disc, 2.5 - 3.0

Features

- Cutting
- Profi cutting discs for fast and comfortable operations
- Discs fulfill highest requirements of work safety
- High performance and long life
- Burr free cutting reduces post-cut operation
- Latest developments of grain and bonding technology
- Free of iron, sulphur and chlorine (prevents contamination of stainless steel material)

Applications

for cutting profiles, solid materials, thicker sheets

MPC Pro Cut Cutting Disc, 2.5 - 3.0

MPG Pro Grind Grinding Disc, 6.5

Features

- Grinding
- Easy way of handling, high workplace convenience
- No signs of fatigue due to a low surface pressure
- Aggressive and controlled bite with fast removal rate
- Free of iron, sulphur and chlorine (prevents contamination of stainless steel material)

Applications

for deburring, weld cleaning, surface cleaning, angle and corner dressing

MDC Laser Beton Diamond Blade

Features

- Laser welded diamond segments for a long durability
- For use with grinding machine and wall chaser
- Use without water cooling
- oSa certified, complying EN13236 safety standards

Applications

concrete, masonry, natural stone, rock, red bricks

MDC Laser Beton Diamond Blade

Article code	Dimension mm	Width of layer in mm	Height of layer in mm	Box content
2320125	125x22.2	2.2	10	1
2320230	230x22.2	2.6	10	1

MDC Performer Diamond Blade

Features

- Laser welded diamond segments for a long durability and a fast cutting speed
- For use with grinding machine and wall chaser
- Use without water cooling
- oSa certified, complying EN13236 safety standards

Applications

concrete and reinforced concrete, masonry, natural stone, rock, red bricks

Article code	Dimension mm	Width of layer in mm	Height of layer in mm	Box content
2321125	125x22.2	2.4	10	1

MDC Performer Diamond Blade

MDC Power M Diamond Blade

Features

- Laser welded diamond segments with M-shape for an extra long durability and an ultrafast cutting speed
- For use with grinding machine and wall chaser
- Use without water cooling
- oSa certified, complying EN13236 safety standards

Applications

concrete and reinforced concrete, masonry, natural stone, rock, red bricks

Article code	Dimension mm	Width of layer in mm	Height of layer in mm	Box content

MFB Diamond Drill Bit

Features

- Head with 2 diamond segments
- Diamond core drilling for ceramic and sandstone
- Shank Ø 10 mm for optimal force transmission
- Core extraction
- Clean and accurate holes
- Orbital movement accelerates dust extraction
- Do not press strongly on the tool - let it work
- Increased lifespan with wet drilling
- Grinding tool: dry drilling, Drilling tool: wet drilling

Applications

glaze, sandstone, sandware, marble, tiles up to 5th class

Modular packing system

The majority of our products are packed in only 9 different folding boxes. You can find an overview of the possible combinations on the folding page in the back of the catalogue. All packing quantities are coded so that the dimensions and quantities can easily be determined.

The advantages are:

- Optimised appearance in uniform boxes
- Increased stability due to smart and reinforced box design
- Co-ordinated packing of all products
- Folding boxes are always compatible with at least two larger outer cartons
