Brand Story

A TRADITION OF INNOVATION

For over 150 years, the STAHLWILLE brand name has stood for a constant drive for perfection. The founder of the company, Eduard Wille, laid down the guiding principle that has been consistently applied by all staff ever since: to develop and produce the best tools possible for and with the customer – nothing less.

Innovative tools

100%

Made in
Germany

Innovative Tools

When it comes to quality, STAHLWILLE knows no compromises. All the products made are manufactured at three locations in Germany under the most stringent quality control conditions. The latest manufacturing methods coupled with the use of the highest-grade materials ensure the closest tolerances are adhered to. And last but not least, it is the proximity to the customer and understanding of production processes and requirements that generates the innovation that the market needs.

More than

600

highly
qualified staff

Staff

In order to provide customers with the high standards of quality and innovative capability they expect of STAHLWILLE, the company relies on well qualified, dedicated staff. Currently at 600, and the number is steadily increasing.

TERMS AND CONDITIONS

Our warranty commences from the date of purchase and is not transferable. The warranty only covers the original owner, purchaser or end user and is subject to the Trade Practices Act and Goods and Consumer Protection legislation of the various states. Proof of purchase along with appropriate documentations is required before consideration under warranty is given.

**Made in Germany
since 1862**

Long before "Made in Germany" was used as a guarantee of quality, Eduard Wille recognised that the highest achievable standard of quality was the key to good development and production. At Wuppertal-Cronenberg, he set up one of the most modern tool forges in Europe. The products made by him and his team soon earned them an excellent reputation.

People make success

Right from the outset, STAHLWILLE has been a responsible employer – the founder himself understood that even the best product is valueless if the employees are not fully committed to their task. Since then, right up to today, the staff at STAHLWILLE – of whom there are now more than 600 – have shared the same passion for excellence in the production of handtools.

Prize Winning Technology

STAHLWILLE's dedication to quality is reflected in several awards – one of which is the coveted iF design award in the industrial design category. STAHLWILLE has been awarded that prize four times: in 2011, 2013 and 2014 & 2017. In 2015, the company was also nominated for the German Design Award.

Customer Feedback

“ You don't know what precision feels like until you've held STAHLWILLE tools in your hand. ”

*“We've had to replace
our tools far less often
since we've been using
STAHLWILLE.
Quality pays for itself.”*

“When it comes to torquing,
I need peak performance.
I can rely on STAHLWILLE
to give me that.”

STAHLWILLE SPANNERS

Strong, extremely tough and durable.

1

CONVENTIONAL SPANNERS

When force is applied to a spanner, the greatest force acts on the joint between the jaw and the shaft. Standard-quality open-jaw spanners do not take this fact into consideration. In the context of normal hard work, this can lead to the tool breaking, causing considerable personal injury.

STAHLWILLE spanners

To reduce the danger of breakage, we add more material where the greatest loads are to be found and take it away from the places that are not under such stress.

In this way, we are able to manufacture extremely sturdy, slim and light tools which also facilitate working in confined spaces due to their compact designs.

2

EXTREMELY RESILIENT, REMARKABLY DURABLE

- Drop-forged from high-grade special steels.
- Optimum hardening in continuous furnaces with no scale build-up or skin decarburisation.
- Gentle quenching in oil.

3

LIGHT AND EASY TO HANDLE

- High resistance to bending and low weight thanks to STAHLWILLE's typical double-T profile.
- Snug-fitting, skin-friendly surfaces thanks to STAHLWILLE's rounded finish.

4

KEY BENEFITS WHEN TIGHTENING AND LOOSENING SCREWS

- Tougher than any screw thanks to the forged double hex.
- Thinner than conventional rings – facilitating work in confined spaces.
- Higher than standard nuts – prevents the spanner jamming on the nut.

5

QUALITY ASSURED

STAHLWILLE's Quality Assurance System was awarded an internationally recognised certificate in accordance with DIN ISO 9001 by the DQS (German Association for the Certification of Quality Assurance Systems).

This one – and the next one: tailored to fit – perfect chrome plating

Load zones in standard-quality spanners

Load zones in spanners by STAHLWILLE

Open-jaw spanners in oil

Absolutely resistant to bending thanks to the double-T profile

Snug-fitting, skin-friendly surfaces thanks to STAHLWILLE's rounded finish

STAHLWILLE No 8 striking face double hex box-spanners are tougher, thinner and higher.

TOOL SOLUTIONS FOR AIRCRAFTS

AOG
Mobile Maintenance
Tool Kits
Maintenance Kits
Cabin Kits
Line Maintenance Sets

Everything in its place and a place for everything. A working environment with interdependent processes and tight schedules requires sophisticated, intelligent and intuitive tool storage. The same holds true for safety-critical maintenance operations, such as aerospace and food processing plants.

The STAHLWILLE Tool Control System combines the highest degree of safety and efficiency with the confidence that no tool is left where it may pose a security risk.

Originally developed for the aerospace industry together with leading aerospace manufacturers, the award-winning STAHLWILLE Tool Control System gives you control over your tools and ensures a high level of organisation and security.

STAHLWILLE'S AS Drive

The rings of STAHLWILLE combination spanners and double ended ring spanners are equipped with the AS Drive* profile: this permits high transmission of forces to the lands of nuts and bolts without damaging them. No-longer will you have to worry about stripping the corners off nuts and bolts.

*Anti-Slip Drive

Sets: Combination spanners OPEN-BOX

STAHLWILLE's HPQ spanners

STAHLWILLE HPQ* spanners are manufactured from selected tough steel alloys. The result: extremely high load capacity with exceptionally thin rings. HPQ spanners are free of cadmium and are therefore suitable for use on titanium alloy parts and titanium fasteners as used e.g. in the aerospace industry, where safety is a crucial factor.

*High Performance Quality

Tool sets for the aerospace industry

For maintenance on aeroplanes and helicopters.

All of our Stahlwille tool sets for the aerospace industry come with the Tool Control System for built in safety. The QuickRelease System for socket spanners and inserts has a safety lock to prevent damage to workpieces and guarantee secure, rapid connection of all components to form a single combined unit, so you can't inadvertently release a tool.

This combined with our Anti Slip Drive and High Performance Quality Steel ensure you have the best tools for the job.

Contact Customer Service on 1300 780 876 for more information and to enquire about the range of tool sets available.

 Made in Germany

Provide guaranteed safety and efficiency. STAHlwille sets of socket spanners and inserts

The professionals in industry and the trades are under pressure to work quickly, accurately and economically. Which is why they make heavy demands on their tools. Due to the numerous technical innovations incorporated in them, STAHlwille ratchets and sockets make a valuable contribution to the prevention of both mistakes and injuries.

By using ratchets, adaptors and inserts made by STAHlwille, professional tradesmen are quite simply "making sure". It does not matter whether it is a full set of tools or individual components – users can be sure they will get top-of-the-range quality every time.

This is guaranteed by adherence to the closest tolerances during production and stringently applied quality assurance measures in accordance with DIN EN ISO 9001. The legendary reliability and precision of these tools is enhanced by a large number of user-friendly features.

- Non-slip, ergonomically manufactured 2-component handles facilitate strain-free working.
- Slim-design sockets enable access to awkward places.
- The QuickRelease system ensures full control over the joint between the ratchet, the adaptors and the sockets.
- Sculpted chemical-resistant cut-outs in special PE foam inlays prevent tools rattling and sliding around.

Set No 45/14/5iQR
in sturdy plastic case

1

Ergonomically designed 2-component handle made of impact-resistant, skydrol resistant plastic.

2

All metal parts are made of high-grade steel (Chrome Alloy Steel, chrome plated).

3

Firm seating and yet easy release of sockets and adaptors.

4

Wear parts can be easily replaced using sets of spares for sockets.

5

Separate pawl to switch from clockwise to anti-clockwise.

Safety advantage 1

STAHLWILLE QuickRelease system

The problem: imagine what happens if a tool falls into an inaccessible place during repair or overhaul work.

The consequences: arduous, costly search and recovery, possibly involving disassembly of an aeroengine or machine.

The solution: the safety lock built into the QuickRelease system prevents damage to workpieces and guarantees secure, rapid connection of all individual components to form a single combined unit. Nothing can get lost because it is not possible to inadvertently release a tool. To release a tool, it is first necessary to press the release button deliberately.

Even if you have oily or greasy hands, attaching and separating the individual components is so simple it noticeably smoothes your workflows.

Safety advantage 2

STAHLWILLE AS-Drive

The problem: removing heavily corroded screws requires the application of considerable force. The socket slips off the head of the screw.

The consequences: uncontrolled movements cause injuries and damage to both the workpiece and the tools.

The solution: STAHLWILLE sockets are equipped with the AS-Drive* profile. This permits high transmission of forces to the lands of nuts and bolts without damaging them. The risk of injury is minimised and the corners of the screw heads and nuts are no longer damaged.

*AS-Drive = Anti-Slip-Drive

Safety advantage 3

STAHLWILLE HPQ*-inserts

The problem: although there is hardly enough room to move, you still have to apply considerable torque to loosen a stubborn screw.

The consequences: many of the sockets available are useless simply because their wall thickness makes them impracticable in awkward places.

The solution: STAHLWILLE HPQ*-sockets are manufactured from selected tough steel alloys. These sockets will not slip off the head of the screw, nor will they stretch when subjected to heavy loads. Their extremely thin walls and unbelievably high load capacity are simply exemplary. HPQ*-sockets are free of cadmium and are therefore suitable for use on titanium alloy parts and titanium fasteners as used e.g. in the aerospace industry, where safety is a crucial factor. They meet these aerospace standards: E DIN EN 3709, E DIN EN 3710, SAE AS 954-E, S.B.A.C. AS 40605/40606, MS-33787, MIL-W-8982.

* = High Performance Quality

CERTIFICATE

This is to certify that the

STAHLWILLE-Group

Eduard Wille GmbH & Co. KG
Lindenallee 27
42349 Wuppertal
Lange Str. 40-56
42857 Remscheid

SWM Werkzeugfabrik GmbH & Co. KG
Bereich Schmiede
Stiller Berg
98587 Steinbach-Hallenberg

has implemented and maintains a **Quality Management System**.

Scope:
Development, manufacture & distribution of tools

Through an audit, documented in a report, it was verified that the management system fulfills the requirements of the following standard:

ISO 9001 : 2008

Certificate registration no. 000018 QM08
Valid from 2015-06-01
Valid until 2018-05-31
Date of certification 2015-04-10

QR The QuickRelease system

Ratchets, handles, extensions, universal joints with safety locks.

Secure, rapid connection between the individual components to form a single combined unit.

Can only be separated by releasing the locking mechanism.

Variable combinations of components possible.

40CL

Clip strips

for socket retention, with 9 or 10 retaining clips. Supplied without sockets.

STAHLWILLE AS-Drive

STAHLWILLE sockets are equipped
with the AS Drive* profile: this
permits high transmission of
forces to the lands of nuts and
bolts without damaging them.
No longer will you have to
worry about stripping the
corners off nuts and bolts.
*Anti-Slip Drive

QR The QuickRelease system

Ratchets, handles, extensions, universal joints with safety locks.

- Secure, rapid connection between the individual components to form a single combined unit.
- Can only be separated by releasing the locking mechanism.
- Variable combinations of components possible.

Drive tools and accessories

3/8" □, finish: Chrome Alloy Steel, chrome plated.

MANOSKOP® 714

Electromechanical torque and angle-controlled wrench

Benefits at a glance:

- Indicating and with cut-out
- 4 measuring methods (torque, angle, torque backed up by angle, angle backed up by torque)
- Freely configurable menu structure
- Includes Sensomaster software for easy configuration of the tool
- 3 function modes: cut-out, peak (indicating mode displaying peak reading) and track (indicating mode displaying current value)
- Angle-controlled measurement without a reference arm
- Data storage ($\leq 2,500$ tightening jobs)
- Acoustic and visual assessment of the joint
- Clockwise and anticlockwise tightening
- Tactile and acoustic trigger signals
- Torque and angle are simultaneously visible
- All readings are independent of the point of application of force with sizes 1, 2 and 4
- Display deviation value $\pm 2\%$ for torque and $\pm 1\%$ for angle

1

High-definition graphical colour display with additional side-mounted indicator lamps

2

Automatic key-lock prevents inadvertent changes

3

Fast, accurate setting via keypad

4

Own ident number can be stored in the wrench

5

Indicator lamps clearly visible from all sides
Yellow light: advance warning threshold reached
Green light: within the target range
Red light: reading is outside the tolerance range

6

In a sturdy plastic case with foam inlays (sizes 40–100 in steel case)
With certificate
Optional extras: Li-Ionen battery No 7195-2 and charger

7

No 7160

8

Individually configurable menus

9

Micro USB interface

10

Battery compartment with smooth-action bayonet fitting

11

Up to 200 joints can be programmed in up to 25 sequences

12

The wrench reminds the user automatically when calibration is due – either by the number of joints or the time interval

MANOSKOP® 714 – indicating and cut-out

Electromechanical torque and angle-controlled wrench

- 4 measuring modes (torque, angle, torque backed up by angle, angle backed up by torque)
- High-definition colour display with additional side-mounted indicator lamps
- Freely configurable menu structure
- Optionally: Li-ion battery No 7195-2 and charger No 7160
- 3 function modes: cut-out, peak (indicating mode with peak value) and track (indicating mode with current value)
- Micro USB 2.0 interface
- Bayonet connection for battery compartment
- QuickRelease safety lock change system for insert tools
- Angle-controlled measurement without a reference arm
- Data storage (< 2500 tightening jobs) as many as 200 joints can be programmed in up to 25 preset sequences.
- Different tolerance limits can be set for each joint
- Acoustic and visual assessment of the joint
- Rapid, accurate setting via keypad
- The automatic keypad lock prevents inadvertent changes
- Overload protection by means of acoustic and visual signals and a fail-safe system (clockwise)
- Automatic notification of the next calibration date, either by the number of joints or the time interval
- Fully automated calibrating and adjusting using the perfectControl calibrating and adjusting unit No 7794-2 (torque) or 7794-3 (torque and angle)
- Units of measure: N m, ft.lb, in.lb.
- Tightening torque is automatically corrected if a deviating extension is entered
- Immediately reusable after release
- Clockwise and anticlockwise tightening – it may be necessary to refit the insert tool rotated through 180° for anticlockwise tightening in the cut-out mode
- Tactile, visual and acoustic trigger signal.
- Torque and angle are simultaneously visible
- All readings are independent of the point of application of force (with sizes 1, 2 and 4)
- Safe handling due to ergonomically designed handle (resistant to oils, grease, fuels, brake fluid and Skydrol)
- 2 certificates (torque, angle)
- In sturdy plastic case (size 40 in steel case)
- Design patent, other patents applied for
- Supplied with Sensomaster software, USB cable, 4 AAA/LR03 micro-batteries, 1.5 V. AAA, 1.2 V, micro NiMH rechargeable batteries can be used
- Display resolution, angle 0.1°
- Display deviation value, angle $\pm 1\%$, ± 1 digit
- Display resolution, torque (< 40 N m: 0.01 N m; > 40 N m: 0.1 N m)
- Display deviation value, angle $\pm 2\%$, ± 1 digit

MANOSKOP® 730D

Electromechanical torque wrench

Benefits at a glance:

- Cut-out and indicating
- Displays the torque actually applied after the wrench cuts out. In this way, the user has the opportunity to optimise his or her working methods.
- Units of measurement: N m / ft.lb / in.lb
- Automatic keypad lock
- Display also works for anticlockwise torque
- Angle-controlled measurement without a reference arm using a supplementary module
- Overload protection by means of acoustic and visual signals
- Automatic compensation to achieve correct tightening torque even if a changed extension is entered
- Different tolerance limits can be set for each joint
- Visual red and green signals in the display confirm the status of the joint
- Additional security for presets using PIN code
- Automatic notification of the next calibration date
- Deviation of indication $\pm 2\%$
- Measure, cut-out and record: When the preset torque is reached, the torque wrench cuts out and indicates this fact to the user via a definite tactile and audible signal. The tightening torques are stored. The data can be transferred to a PC for evaluation and documentation.

7395-1

1

The square drive enables a broad range of insert tools

2

Dual stop signal with tactile and acoustic cut-out signals

3

Easy-to-read display

4

Rapid setting
The convenient keypad enables the torque wrench to be quickly and easily set

5

Power supply two 1.5 V AA batteries

6

Angle controlled tightening
Simply attach the Angle Module No 7395-1 and connect the cable to the interface

7

Data output USB interface

8

2-component handle has ergonomically designed, green softer layers and is resistant to oils, grease, fuels, brake fluids and Skydrol.

9

QuickRelease safety lock

Service work & series production MANOSKOP® 730D – indicating and cut-out

This electromechanical torque wrench combines the “indicating” and “cut-out” functions in a single tool; the function modes can be selected independently of each other. With a mount for interchangeable sockets and inserts and QuickRelease safety lock; rapid setting using the convenient foil keypad and large display; tactile and acoustic trigger signal.

Differing tolerance limits can be set for each joint. Visual red and green signals in the display confirm the status of the joint. Display also works for anti-clockwise torque. 7500 data records can be stored, transferred via a USB interface and evaluated on the PC. Automatic compensation to achieve correct tightening torque even if a changed extension is entered.

Overload protection by means of acoustic and visual signs. The automatic keypad lock prevents inadvertent changes.

Additional security for presets (function mode, trigger or preset value, unit of measurement, tolerance, save, deviating extension) using PIN code.

All the sensitive components are protected by the sturdy housing. The 2-component handle with its ergonomically designed green softer layers is resistant to oils, grease, fuels, brake fluid and Skydrol. Included in the set are 2 AA NiMH rechargeable batteries, 1.2 V, 2300 mAh. It is also possible to use 1.5 V AA batteries.

Automatic notification of the next calibration date. Simple calibration and, if required, adjustment without disassembly using Torque Tester No 7707 W. Units of measurement: N m, ft.lb in.lb Guaranteed maximum accuracy deviation $\pm 2\%$. With certificate. (Inserts see page 62 of this catalogue)

MANOSKOP® 730N

Mechanical torque wrench

Benefits at a glance:

- Accurate one-handed setting – quick & easy control using the knob at the end of the handle
- Audible setting positions
- Fail-safe setting mechanism in the knob
- Clearly readable twin scale (N m and ft.lb)
- Noticeable double signals when the preset torque is reached
- Square drives with
- QuickRelease safety locks – for 9x12, 14x18 and 22x28 mm
- Handle is resistant to oils, grease, fuels, brake fluids and Skydrol
- Deviation of indication $\pm 3\%$

1

Protected mechanism extremely resistant to mechanical wear, protected against dirt inside the outer housing

6

No need for manual reset to zero thanks to the wear-free triggering cam system. The measuring element is only under load while force is being applied.

2

Easily readable double scale. The colour differentiation between the N m and ft.lb scales simplifies fine setting

7

The square drive enables a broad range of tightening tools

3

Two-component handle made of extremely tough, impact resistant plastic with a kind-to-the-hands softer layer

8

Rapid adjustment from outside, no disassembly of the torque wrench

4

Ring scale with fine settings for the black measuring range on the twin scale

9

QuickRelease safety lock
Firm locking and rapid change of insert tools thanks to the QuickRelease safety lock

5

QuickSelect rapid setting: Pull, set, lock. All using the one setting knob

10

Integrated clockwise and anticlockwise operation simply by turning over the wrench and insert tool

Service MANOSKOP® 730N

Clicking torque wrench with mount for interchangeable socket tools, rapid, accurate setting using QuickSelect quick-action adjuster, with QuickRelease safety lock, double stop signals, very clear twin scales with colour coded N m/ft.lb and ft.lb/inch.lb. markings and long-term repeated accuracy.

The measuring element is only under load while force is being applied, no need for manual reset to zero.

All the sensitive components are protected by the sturdy housing. The 2-component handle with its ergonomically designed green softer layers is resistant to oils, grease, fuels, brake fluids and Skydrol.

If the wrench is misused – e.g. to force seized-up screws – the measuring mechanism is deactivated.

The swap-over inserts can also be used to apply torque in an anticlockwise direction. Easily adjustable without disassembly, e.g. using testers No-798, No-799 or No-7707 W.

Guaranteed maximum accuracy deviation $\pm 3\%$. With certificate.

* Ratchet has quick-release safety lock

Service MANOSKOP® 730

Torque wrenches offering quick adjustment, with cut-out, with QuickRelease safety lock (size 5-65) dual signal (size 2-40), dual scale N m/ft.lb. resp. N m/inch.lb. (size 5-80), long term accuracy and facility to accept insert/shell tools.

The robust steel tube completely encloses all working parts. Even when misused (slackening sized bolts for example), the measuring element remains stress free. Reversible insert/shell tools allow anticlockwise operation.

Recalibration, without dismantling, with the aid of checking gauges No-798, No-799 or No-7707 W.

Guaranteed accuracy $\pm 4\%$. With certificate.

Sensotork® 713R

Electronic torque wrench/angle-controlled wrench

Benefits at a glance:

- Angle-controlled measurements without a reference arm
- Broad measuring range (5% – 100% of rated value)
- Extremely wide range of angle measurement
- Units of measurement N m / ft.lb / in.lb
- Clockwise and anticlockwise use
- For use with all insert tools 9x12 and 14x18 mm
- QuickSelect rapid recall of predefined sets of operating parameters
- Defined sequence – a number of repeated joints can be grouped as a defined sequence
- Readings can either be directly stored, transmitted to the PC or simply displayed
- Password protection tamper proof use
- Freely selectable names for each series of test
- Various languages available
- Works-specific identifier
- Programmable via PC
- Resistant to oils, grease, fuels, brake fluids and Skydrol
- Wide range of application: –20°C to +60°C
- Meets requirements of DKD-R 3-7, Class 2
- Deviation of indication $\pm 1\%$

1

Warning signals: acoustic (buzzer), tactile (vibration in the handle), visual (LEDs and display). The point at which the warning signal is triggered can be freely set

2

Amazingly simple handling
All functions are selected using the arrow keys. The visual guidance system makes operation a simple matter

3

Measurements independent of the point of application of force (sizes 6 and 20)

4

Easy extension setting
Where the insert tool requires an extension adjustment, simply enter the new value. Recalculation using complicated formulae is no longer necessary

5

Data output USB interface

6

QuickRelease
Firm locking and rapid change of any insert tools

Electronic angle-controlled torque wrench Sensotork 713

Simple, flexible operation thanks to operator guidance on large-format display.

Very broad measuring range (5 % to 100 % of rated value) with display deviation value of $\pm 1\%$ of the current reading.

Display deviation value of angle is $\pm 1^\circ$.

Repeated joint can be collated to form a single menu-guided sequence.

713R

Electronic angle-controlled torque wrenches Sensotork

Electronic angle-controlled torque wrench with insert tool pawl-action ratchet, with QuickRelease safety lock, for clockwise and anticlockwise use, readings independent of point of application of force, choice of many units of measurement, advance warning points for visual, tactile and acoustic signals, torque and angle are simultaneously visible, convenient angle measurement across a very wide angle range without a reference arm, choice of individual insert lengths, maintenance friendly due to easy adjustment and automatic reminder of next calibration date, individual identification possible, tamper-proof due to password protection, meets requirements of DKD-R 3-7, Class 2 and DIN EN ISO 6789, with works certificate in accordance with DIN EN 10204, supplied in sturdy plastic case (size 40 in sturdy steel case).

Sensotork® 7707 W

Workshop testers

Benefits at a glance:

- Transducers can be individually recalibrated, your torque tester stays on site
- Compact, can be used as a mobile laboratory (power supply is via the usb connection)
- The readings can be evaluated and digitalised inside the transducer (no external interference from a data cable)
- Effect of lateral forces considerably reduced thanks to low-profile construction
- Many operating modes
- Automatic transducer detection
- Wide range of application (-20°C to 60°C).
- Acoustic overload warning
- Clockwise and anticlockwise use
- Broad measuring range (0.9 %-100 % Of rated value)
- Display deviation value up to ± 0.25 % Of reading
- Meets din 51309, class 2, with works calibration certificate
- Traceable to national standards
- Solid aluminium mounting block incl. Attachment for horizontal and vertical testing

- 1** Displays and controls: This highly user-friendly unit can display both the preset torque value and the actual torque applied at the same time. The unit can be positioned the way it suits you best – especially convenient where the measuring axis is horizontal or if you are using the tripod supplied, which includes the cable (1.5 m).
- 2** Quick Release
Rapid change and firm locking of the transducers thanks to the QuickRelease safety lock.
- 3** Interchangeable square drive adapters:
A set of interchangeable square drive adapters are conveniently stored in the mounting block for a range of different drive sizes.

- 4** Intelligent transducers:
The readings are fully evaluated and digitalised inside the transducer using special, integrated circuitry. As an alternative to the display unit, you can use a PC and connect the unit via a USB cable, which also allows you to perform and organise measurements and generate a calibration certificate directly.
- 5** Interchangeable transducers:
The measuring range of the torque tester can be extended flexibly simply by changing the transducer for one with a different range.

Electronic Torque Tester for torque wrenches Sensotork 7707 W

Compact workshop-based torque tester for easy adaptation by replacement of the transducers.

High degree of accuracy (from 20-100 % of the rated value ± 0.25 % display deviation from actual measured value, up to 20 % of rated value ± 1 %) thanks to flat transducer and conversion and digitalisation of readings within the transducer.

High degree of safety through display showing actual torque read-off where clicking torque wrenches are used.

7707 W

Workshop torque tester Sensotork

Electronic workshop torque tester for torque wrenches, consisting of:

- transducer (registered design)
- holder
- display unit (registered design)
- tripod for display unit (with 1.5 m cable)
- spiral cable
- mains adaptor (220 V) or direct connection to 12 V in-car supply is possible
- square drive adaptor (No-7707-2W, No-7707-3W)
- kit for attaching the unit to a workbench or wall in a horizontal or vertical testing position for clockwise and anticlockwise use.

The easily interchangeable transducers are attached to the holder by means of a QuickRelease safety lock.

Low lateral forces thanks to low-profile transducers, automatic detection of the transducer, flexible and user friendly because the unit can be used horizontally or vertically and the display unit can be placed in many positions, additional tripod with 1.5 m cable for mounting the display unit to facilitate visual monitoring when using longer torque wrenches, especially broad measuring range from 2% to 100% of rated value ($< 1\%$ at 1100 N m).

Readings can be transferred to PC via the USB cable (no separate power supply needed, power comes from PC). While individual transducers are being recalibrated, the torque tester itself remains on-site for further use. Wide range of application (-20°C to $+60^{\circ}\text{C}$). Meets DIN 51309, Class 2. With works certificate in accordance with DIN EN 10204. Supplied in sturdy plastic case.

Great freedom of choice – DRALL⁺ screwdrivers

A new challenge every day, a new tool every day to meet that challenge. The DRALL⁺ series was developed for professionals faced with new challenges on a daily basis. Development focussed on three crucial user requirements: durability and reliability, safety in use, pleasant to handle. These requirements are met in full by DRALL⁺ screwdrivers – in fact, they feel so natural, you will hardly notice them.

The profiles

DRALL⁺ is available for the following screwhead profiles:

- ⊖ Slotted
- ⊕ PH cross-head
- ⊕ PZ cross-head
- ⊗ TORX®
- ⊗ TORX® Tamper Resistant with a central bore
- ⊙ Hex with a ball-end
- ⊕ TORQ-SET®

4 handle sizes

The handle sizes for the DRALL⁺ screwdrivers are designed specifically to match the drive profiles.

1

The hand-stop helps stop injuries – Flange-like design. Supports your hand in the direction of the blade to prevent it slipping off the handle. Features integrated anti-roll shape.

2

The multifunctional section – The lower end of the handle is deliberately made extra-long. This enables the thumb and index finger to wrap around more easily and spin the screwdriver.

3

The transmission zone – The rounded cross-section in the central area combines maximum grip and easy turning.

4

The elastic handle components – The soft rubber textured thermoplastic elastomer (TPE) fits snugly in the hand. These sections are injection moulded around the hard core and bonded to it inseparably.

5

The firm handle components – The green zones are made of high-grade, impact-safe polypropylene (PP). The tang is anchored in the core to allow force to be transferred through it.

6

Impact-resistant cap – For use under extreme conditions, the DRALL⁺ is also available with a one-piece shaft, an impact head and a metal impact cap.

VDE insulated screwdrivers: High-grade materials and durability testing guarantee absolute safety when working on AC systems up to 1000 V (effective voltage) or 1500 V DC.

The power is where you put it with the 3K DRALL® screwdriver series

The efficiency with which you use a screwdriver in your daily work, and the safety with which you work, depend to a large extent on the quality of the tool. It is not just the use of high-grade materials but also the shape that matters – in particular the shape of the handles – if you want to stay in control. STAHLWILLE's 3K DRALL® screwdrivers unite these positive qualities in a manner which is close to perfect. The result is a longlife, ergonomically designed tool providing easy working combined with maximum force transmission – even with greasy hands.

3K DRALL® screwdrivers are available in sets conveniently positioned in plastic inlays or TCS safety inlays, designed for use with STAHLWILLE Tool Trolleys and Tool Boxes.

1

3K DRALL® handles are made up of 3 components:

1st component – Extremely resistant, impact-safe core made of black polypropylene (PP).

2

2nd component – Soft, heat-bonded inlay made of easy-to-grip thermoplastic elastomer (TPE).

3

3rd component – Two large surfaces coated with special fibres, resistant long-term to solvents to improve force transmission and work safety.

4

Additional Tommy-bar hole – When things get really tough, the additional Tommy-bar hole will cope with a fair amount of torque.

Blades – Made of high-grade Chrome Alloy Steel. Through-hardened. Anchored firmly in the shaft due to the extra-wide, forged tang. High resistance to bending.

Tips – Black, extremely tough, retain their shape. Whether you use the straight-bladed or Phillips type – the crosshatched blade tips will accurately transmit maximum force to the screw head.

4891 3K DRALL® set of screwdrivers

Set of six 3K DRALL® screwdrivers.

Content:

Accurate. Strong. Dependable.

STAHlwille pliers, cutters and wrenches

For accurate work and a powerful grip – with comfy-fit multi-component handles.

When you are working with pliers, your hand needs optimum support and protection in the places where the pressure exerted on the hand is felt most keenly – through ergonomic handle design. STAHlwille has integrated softer layers in these sections of the handles.

In this way, they fulfil two important functions. They prevent the hand slipping off the handle and, at the same time, absorb the shock produced when hard wires are cut. Even with oily or greasy hands, the textured surface ensures you still have a good grip on things. The special plastic we have used is also resistant to aggressive fluids and, at the end of the lifecycle, can be properly disposed of, because it does not contain PVC.

1

Accurate gripping! By using high-grade materials and applying our sophisticated manufacturing techniques, we are able to achieve remarkable accurately shaped jaws.

2

Clean, effortless cutting! Thanks to specially hardened, high-precision cutters.

3

Strain-free working and longer tool lifetimes! Thanks to smooth-action lap-joints.

4

Prevents injuries! The anti-slip protection prevents your hands slipping off towards the jaws.

5

Longer tool lifetime and resistance to aggressive fluids! Thanks to impact-resistant, extremely hard-wearing special plastic.

6

No pinch marks and strain-free working! The ergonomically positioned softer layers improve force transmission.

6501 Combination Pliers

DIN ISO 5746,
precision cutter for all wires, incl. piano wire,
induction hardened cutting edges,
approx. 62 HRC, for long life.
