COMMERCIAL GRADE CHAIN

Regular Link (Proof Loaded)

Austlift proof loaded chain is manufactured from low carbon steel and comes in a variety of link formations and is used for agricultural, industrial, manufacturing, marine and general engineering applications.

- General purpose chain with a variety of link dimensions.
- Manufactured from low grade carbon steel.
- Packed in 25/50kg pails, 500kg drum or cut length.
- Available in self colour/black, hot dip galvanized.

Regular Link (G304, G316 Stainless Steel Chain)

Austlift stainless steel chain is manufactured from G304, G316 stainless which is highly resistant to corrosion in acid and alkaline and is well suited for marine applications.

- Available in a drum or cut lengths to suit your requirements.

WARNING NOT FOR LIFTING APPLICATIONS

Preventing Coastal Corrosion

When used properly, stainless steel enjoys a strong and enduring reputation for visual appeal and structural integrity in a wide range of applications and environments.

But, like all materials, stainless steel may become stained or discoloured over time, impairing the overall look. This brown discolouration - tea staining - has been identified in coastal applications in Australia and overseas.

Please refer to Australian Stainless Steel Development Assoc. website: www.assda.asn.au/technical-info/technical-faqs/preventing-coastal-corrosion-tea-staining

Quick Link

Quick links are used as a temporary way to connect commercial fittings commonly used with chain.
