Viper Drills

The Viper bit point design is 118° split point is self-centring. It minimises wandering when starting and requires less power when drilling.

Viper Plus Drills

Industrial quality drill bit designed for machine and hand held drilling in stainless steel, steel, aluminium, cast iron, brass, wood and plastic.

Bright Drills

General purpose drill bit designed for machine and hand held drilling in a wide range of ferrous & non-ferrous materials.

Blue Drills

The blue finish reduces chip build up on the cutting edge and is a better choice when drilling ferrous materials.

TiN Drills

Lasts up to 6 times longer than standard HSS drill bits.

INOX Drills

Industrial quality drilling solution specially designed for superior performance in stainless steel.

Cobalt HSS Drills

Industrial quality drill bit for drilling materials that have high hardness & tensile strength such as cast iron, bronze, hard steel & stainless steel.

SDS	Masonry Drill & Chisel Set: 12 masonry, 3 flat chisels & 2 Point chisels	Aluminium	17	1	92346	9312621923462	\$83.61

General purpose drill bit designed for machine and hand held drilling in a wide range of ferrous & non-ferrous materials.

Reduced Shank

Drill sizes above 10mm & 3/8" feature reduced shanks to suit 10mm drill chucks

Made from HSS

Stronger and out performs a conventional drill bit

118° Split Point
Drills >3.5mm & 9/64"
Minimises wandering
when starting

† Viper Bits have 10mm (3/8") reduced shank for sizes > 10mm (3/8").

Drills Jobber – Viper Plus

suttontools **VIPER PLUS**

Industrial quality drill designed for machine and hand held drilling in stainless steel, steel, aluminium, cast iron, brass, wood and plastic.

Featuring a Futura Nano PVD coated tip – the latest generation coating for ultimate wear resistance and increased productivity.

Made from HSS
Stronger and
out performs a
conventional drill bit

2X Greater Tool Life
Independently tested
for longer life compared
to regular drill bit

**Futura Nano
PVD Coated Tip**
For ultimate wear
resistance

[illegible]

The highest wear is incurred at the drill tip and cutting edges to depths twice the drill diameter.

The P&N Workshop drill range with its Titanium Nitride coated tip is protected where it matters.

Drill depth indicator

Parabolic Flute Design
Radius flute edge for increased chip evacuation

135° Split Point
Enables accurate positioning and less drilling pressure

TiN Coated Tip
For increased wear resistance delivering 3 x longer life

suttontools

Sutton Tools INOX jobber drills are an industrial quality drilling solution specially designed for superior performance in stainless steel.

Tailored to overcome the difficult-to-machine material properties of stainless steel, INOX drill bits have a fast spiral, short flute and unique stepped core design providing a smooth and effortless cutting action never before seen.

INOX
STAINLESS STEEL

70%
MORE LIFE*

Specialised design
Achieves 70% more life in stainless steel than standard drill bits

Unique Point And Stepped Core
Designed for superb penetration and minimal work hardening

Futura Nano PVD Coated Tip
For ultimate wear resistance

Short Flute With Fast Spiral
For maximum rigidity & swarf control

Drills Jobber – Cobalt

suttontools

Industrial quality for drilling materials that have high hardness and tensile strength such as cast iron, bronze, hardened steel & stainless steel.

Cobalt Alloyed
The 5% cobalt formula improves abrasive & heat resistance, for increased strength at higher drilling temperatures

Thick Core
For increased rigidity in hard materials

135° Split Point
Drills > 2mm & 3/32
Enables accurate positioning and less drilling pressure

Surface Finish
Colour tempered finish enables identification of cobalt drills

Drills Jobber – Left Hand Cobalt

suttontools

Left-Hand jobber drills feature a left hand helix for screw machine applications where spindles rotate counter-clockwise. Suitable for general-purpose drilling and can also be used to drill out broken bolts in conjunction with Sutton Tools screw extractors.

Cobalt Content
Ensures high abrasion & heat resistance

Spiral Flute
Heavy duty spiral flute design produces faster chip ejection

Left-Hand jobber drills
Left hand helix for screw machine applications where spindles rotate counter-clockwise

Length
Shorter drilling length designed for rigidity

118° Standard Point
Common point for general purpose applications

SILVER BULLET
TWIST DRILLS

General purpose drill bit designed for machine and hand held drilling in a wide range of ferrous & non-ferrous materials.

Parallel Shank
Precision engineering for accurate hole size

Made from HSS
Constructed from M2 high speed steel offering the best combination of strength, heat & wear resistance

118° Standard Point
Common point for general purpose applications

Drills Jobber – Impact

suttontools

SUPABIT
EXTREME IMPACT

Supabits are developed for use with the high torque output of an impact driver and are suitable for general purpose use in metal, timber and plastics.

Check out the demo

135° Split Point
Enables accurate positioning and less drilling pressure

1/4" hex shank
Suitable for use in impact drivers

Parabolic Flute
Provides 3x faster penetration than standard bits

Battery Saving Technology

For 50% more holes per battery charge than standard drill bits

Application

Drills Long Series

suttontools

Offers longer flute & overall length than standard drill bits. Ideal for drilling deeper holes.

118° Standard Point
Common point for general purpose applications

Blue Finish

Drills >2.5mm & 7/64"
The blue finish reduces chip build up on the cutting edge and is a better choice when drilling ferrous materials

Precision Ground Flute

Designed for fast chip removal

Drills Long Series – Extra Long Reach

suttontools

300mm overall length for drilling deep holes in long reach applications.

Made from HSS

Constructed from M2 high speed steel offering the best combination of strength, heat & wear resistance

135° Split Point
Minimises wandering when starting

Bright Bits

General purpose drill bit designed for machine and hand held drilling in a wide range of ferrous & non-ferrous materials

Application

Sutton Tools spot weld drills are designed for vehicle body repairs. For quick and precise drilling through existing auto panel spot welds, releasing damaged panels and enabling replacements to be fitted. Spot weld drills have a spur point designed to cut through the weld on one panel while leaving only a slight mark in the second panel.

HSS Co

Suitable for spot weld pneumatic disconnectors.
Cutting Speed: 500 – 800 RPM

Carbide

Suitable for drilling Very-High Elastic Limit (VHEL) and Boron steel sheet metal found in modern cars.
Cutting Speed: 1000 – 1200 RPM

Centre Nib
Enables accurate positioning and less drilling pressure without work hardening

Shallow point design
Cuts through top panel while only slightly marking second panel

Flat Shank

Cobalt Alloyed
The 8% cobalt formula improves abrasive & heat resistance, for increased strength at higher drilling temperatures

Drills Spade Bits

suttontools

5x faster than standard spade bits.

The Sutton Tools spade bit incorporates the latest design technologies for the most powerful and fastest cutting bit on the market. Combining a power chip-breaker and heavy duty shank to increase efficiency and battery life of your power tool, with clean cutting and minimal break out on exit. Designed for drilling in timber and light building materials.

Impact Ready
Suitable for impact drivers and standard power drills

Heavy Duty Shank
For maximum strength & durability

Spur Cutting Edge
Reduce splintering and ensure a smooth clean hole

Hole

For hanging in workshop and pulling wires through holes

Drills Auger Bits – Landscape

suttontools

Scotch Pattern auger bits provide more stability and accuracy than standard auger bits making them very suitable for landscape use - in rough, heavily grained or knotted timber. Suitable for boring in hard and soft wood. Also effective for boring in end grain of soft wood, and the end or cross grain of hard wood.

Power Groove Hex Shank
For positive grip, preventing slippage in chuck. Fits Sutton Tools extension shanks

Made from Carbon Steel
Heat treated and tempered over full length for extra durability and long life

Scotch Pattern
Robust scotch pattern flute withstands the hardest wood drilling applications

Coarse Screw Point
Draws the bit into the work piece providing fast drilling in hard and soft woods

Application

DIY
Trade
Landscaping

Drills Masonry SDS Plus – Stop Drills

suttontools

Sutton Tools Stop Drills are perfect for use with drop in anchors. Featuring an integrated depth stop to accurately control the required drilling depth allowing fast, high-volume installation. Key applications include suspended electrical and ventilation systems, fixed-location seating and bollards.

Suitable for all types of concrete, brick, aerated concrete, stone & granite. Will drill through reinforced concrete mesh.

SDS Plus Shank
Suits most SDS Plus rotary hammer drills

Sand-blasted Finish
Environmentally friendly production method with zero heavy metals

Depth Stop
Integrated depth stop for accurate hole depth

Progressive Flute
Half-round spiral accelerates dust extraction away from tip
Square spiral combines compression channel with a depression chamber for perfectly controlled dust removal

Three Cutting Edge
135° self centring tip with three cutting edges guarantees a perfectly round hole

The PGM standard (PGM stands for "Prüfgemeinschaft Mauerbohrer" – drill bit testing) is the only guarantee of a perfect geometry for the precise drilling and preferred setting of your anchor studs. It is recommended to use only drill bits with this marking for anchor fixings to prevent accidents and liability cases.

Drills Masonry SDS Plus – 2 Cut

suttontools

Professional quality, 30% faster than conventional SDS drills.
For concrete, brick, aerated concrete, stone & granite.

The PGM standard (PGM stands for "Prüfgemeinschaft Mauerbohrer" – drill bit testing) is the only guarantee of a perfect geometry for the precise drilling and preferred setting of your anchor studs. It is recommended to use only drill bits with this marking for anchor fixings to prevent accidents and liability cases.

The PGM standard (PGM stands for "Prüfgemeinschaft Mauerbohrer" – drill bit testing) is the only guarantee of a perfect geometry for the precise drilling and preferred setting of your anchor studs. It is recommended to use only drill bits with this marking for anchor fixings to prevent accidents and liability cases.

Drills Masonry SDS Plus – Reo Pro 3 Cut

suttontools

Professional quality, 30% faster than conventional SDS drills. Will drill through reinforced concrete mesh.

Check out the demo

3CUT

Unique TCT
Three cutting edge self centring tip prevents snagging on reinforced mesh

Sand-blasted Finish
Environmentally friendly production method with zero heavy metals

SDS Plus Shank
Suits ALL SDS Plus rotary hammer drills

Combination Spiral Flute
Half-round spiral accelerates dust extraction away from tip
Square spiral combines compression channel with a depression chamber for perfectly controlled dust removal

Drills Masonry SDS Plus – Tradesman

P&N Tradesman SDS Plus Masonry Drills are tradesman quality.
Ideal for use in reinforced concrete, brick, aerated concrete, stone & granite.

4 Cutter TCT Tip
Drills faster with less vibration than standard bits

SDS Shank
Suits most SDS Plus rotary hammer drills

Sand Blasted Finish
Environmentally friendly production method with zero heavy metals

Drills Masonry SDS Max – Reo Pro 3 Cut

suttontools

Professional quality, 30% faster than conventional SDS drills.
Will drill through reinforced concrete mesh.

SDS Max Shank
Suits ALL SDS Max rotary
hammer drills

Sand-blasted Finish
Environmentally friendly
production method with
zero heavy metals

Combination Spiral Flute
Half-round spiral accelerates dust
extraction away from tip.
Square spiral combines compression
channel with a depression chamber
for perfectly controlled dust removal

Unique TCT Tip
3 cutting edge self centring
tip prevents snagging on
reinforced mesh

The PGM standard (PGM stands for "Prüfgemeinschaft Mauerbohrer" – drill bit testing) is the only guarantee of a perfect geometry for the precise drilling and preferred setting of your anchor studs. It is recommended to use only drill bits with this marking for anchor fixings to prevent accidents and liability cases.

Drills Masonry SDS Max – Reo Extreme 10 Cut

Drills Masonry SDS Max – Speeduster 10 Cut

Check out the demo

suttontools

Designed for clean and fast drilling with its 10 cutters, 100% carbide massive head system. Wide extraction holes allows immediate dust extraction with an attached vacuum via the connecting sleeves.

The dust extraction also allows faster drilling due to minimal blockage during drilling and can significantly extend tool life. For heavy duty drilling in reinforced concrete, concrete, granite, stone and bricks.

Standard SDS
Max Drill

Dust pile

**SPEEDUSTER
SDS MAX**

Clean holes

Drills Masonry SDS Max – *Ultimax**

For deep core drilling in granite, marble, aerated concrete, brick, stone and hard stone. Will drill through reinforced concrete mesh.

Shank
Suits ALL SDS Max rotary hammer drills

Sand-blasted Finish
Environmentally friendly production method with zero heavy metals

Six Cutting Edges
Self centring tip. Does not bind in concrete. Improved hole concentricity

Double Spiral Flute
For long life and robustness, perfectly controlled dust removal and reduced vibration

The PGM standard (PGM stands for "Prüfgemeinschaft Mauerbohrer" – drill bit testing) is the only guarantee of a perfect geometry for the precise drilling and preferred setting of your anchor studs. It is recommended to use only drill bits with this marking for anchor fixings to prevent accidents and liability cases.

*Not available once current stock is depleted.

suttontools

Core Bits SDS Plus

Light duty for electrical equipment and door frames. Core Bits drill bricks, limestone and Concrete panel. For rotary hammer drills not exceeding 700W.

Tungsten Carbide Teeth
Welded at high temperature for stronger cutting performance

40mm Cut Depth
For light duty application

Discount Group: A0608

Pointed (Helical)
For general purpose chiselling and breaking work.

Flat
Targeted chiselling and breaking work.

Angle Head
For easy removal of tiles.

Toothed
Tungsten carbide tipped for repointing, removing bricks, tiles and plaster.

Brick Chasing
Ideal for cabling and plumbing applications.

Concrete Chasing
For cutting narrow channels.

Chisels SDS Plus – Tradesman

Tradesman Quality

SDS Plus Chisels, forged from toughened steel to ensure long life and fast, efficient work.

Drills Masonry – Tradesman

P&N Tradesman Multi-Purpose drills are suitable for drilling in various materials such as hardened steel, cast metal, glass, acrylic, fibreglass, masonry, ceramic, concrete, brick, granite, marble, soft wood and hard wood. Perfect for multi laminated construction materials.

Shank
3-Flat Shank for greater torque

Made from 50CrV
For greater impact resistance

Sharpened TCT Tip
Two cutting edges for high wear water resistance in most material types

Special brazing process
Withstands temperatures up to 1000°C

Discount Group: A0604

Drills Glass & Tile

suttontools

For smooth drilling in ceramic tiles, glass, brick, plastics, and fibreglass.

Note: Not suitable for toughened glass and hard tiles above class 3.

Parallel Shank
To suit non-hammer
action portable
power drills

Longer total length
Than standard tile bits
for deeper drilling

Spiral flute
Aids dust extraction and
reduces heat build up for
30% faster[†] drilling

Stronger carbide tip
With copper brazing
has better heat
resistance and provides
7x longer life[†]

**4 facet diamond spear
point design**
Shaves rather than cuts
for improved precision
and penetration

Core Bits Diamond – Blue Ceram

suttontools

Features diamond segment technology for long life, using with water.

For drilling porcelain, monocottura, marble, glazed, terracotta, sandstone & standard ceramic tiles.

Shank

10mm hex shank to suit non-hammer action portable power drills

Core Cavity

Large cavity for fast material extraction

Point

Diamond segment tip for long life. Can be dressed for optimal performance

*Blue Ceram drills oversize to allow drilling and fixing into material below the surface without chipping the tile.

Instructions For Use

Water the drilling area. To avoid drill slipping start with a 45° angle.

After the hole is started gradually straighten up the drill.

Make a swinging movement to allow for dust evacuation.

Make sure the core has been removed from bit after drilling.

When tip darkens, it is becoming blunt and MUST be dressed using a dressing stone.

Helpful Hints

- Do not use with hammer setting as this will damage the bit and tile
- Apply consistent pressure, allowing the tool to do the work
- Cutting speed with water <3000 RPM
- Dressing the bit will increase performance

Water Dripper

D605 WAT2

Core Bits Diamond

DIY Quality. Diamond Tile Core bits have diamond encrusting for wet drilling only. For drilling glazed and polished porcelain, sandstone, terracotta & ceramics.

Point

Diamond encrusted tip to cut through glazed & polished porcelain, sandstone, terracotta & ceramics

Accuracy

Cuts to $\pm 0.2\text{mm}$ tolerance

Shanks

Parallel / Plain Shank

The straight shank is the most usual style on modern drill bits, by number manufactured. It is most often made with the same diameter as the drill bit, for economy. It's then held in a 3-jaw drill chuck. Very small bits can have straight shanks larger than the drill diameter, often for holding in a standard size collet. Large drill bits can have straight shanks smaller than their drill diameter, so that medium-size chucks can be used to drill large holes. Such a drill bit is called reduced-shank or a blacksmith's drill.

- Can be held in a collet chuck
- Can be held in a drill chuck, the commonest sort
- Very accurate centring
- Low torque transmission

Hex shank

The flats of a hex shank can either be machined on a round shank or can be the natural flats of hex bar stock. A hex shank can be grasped by a 3-jaw drill chuck, or can be held in a custom chuck specifically for hex shanks. 1/4 inch hex shanks are common for machine screwdriver bits, and have spread from that application to be used for drill bits that are compatible with screwdriver machinery.

- Can be held in a drill chuck
- Can be held in a screwdriver bit chuck
- High torque transmission
- Moderately accurate centring
- Cannot be held in a collet

SDS shank

The SDS shank has the advantage of a simple spring-loaded chuck, so that bits can be chucked with a simple and quick hand action. Further, the shank and chuck are uniquely suited to hammer drilling in stone and concrete. The drill bit is not held solidly in the chuck, but can slide back and forth like a piston. The hammer of the drill acts to accelerate only the drill bit itself, and not the large mass of the chuck, which makes hammer drilling with an SDS shank drill bit much more productive than with other types of shank. So, SDS shanks are most often seen on masonry drills for which hammer drilling action is most helpful.

SDS is available in four sizes, SDS, SDS plus (or SDS-plus or SDS+), SDS-Top and SDS-max. SDS-plus is the most common by count of tools manufactured, with masonry drills from 5mm diameter to 30mm diameter ordinarily available.

The SDS bit was developed in 1975 and the name comes from the German saying "Steck – Dreh – Sitz" (Insert – Twist – Stay).

German-speaking countries may use "Spannen Durch System" (Clamping System), though most use "Special Direct System" for international purposes.

- Superb hammer drilling performance
- Drills with a "rotation-stop" mode can use chiselling bits
- One-handed quick chucking operation
- Can only be held in an SDS chuck
- High torque transmission

The flute (spiral) with a long pitch (lead) permits a quick removal of the aggregates (dust). The new finishing (treatment) "sandblasted" strengthens the body of the drill in the surface while guaranteeing good flexibility. Ideal for soft and medium hard materials and for wet concrete. The shank is suitable for all SDS plus hammer drilling machines.

Environmental Statement

Sutton Tools masonry drills are certified ISO 14001 for sustainable development. These products contribute to environmental protection by a "sandblasted" surface treatment which guarantees zero heavy metals and by a protection called "without VOC (Volatile Organic Compounds)" meeting the European directive 1999/13CE.
