## ULTRABIT

Scan to watch video

### 12X LIFE

### UltraBit Screwdriver Range

Sutton Tools UltraBits, with impact torsion neck, designed to withstand high torque impact applications.

#### Features

- Shock Absorber Zone – Impact torsion neck, designed to withstand high torque screwing, lasting 12x longer than standard bits.
- Anti-Breakage – Reinforced joints for a stronger link avoiding breakages.
- Ring Reinforcement – Reinforced screw head ring for longer impact resistance.

#### Impact

Impact Bits – specifically developed for use with the high-torque output of an impact driver. Look out for the “Impact” logo on the packaging.

#### Magnetic

All bits are magnetic eliminating frustration and increasing productivity when working at awkward angles or in tight spaces.

#### Torsion

Shock Absorber Zone – Impact torsion neck, designed to withstand high torque screwing.

#### Precision Fit

Precise Fit – Avoids slipping and stripping screw heads.

Available in:

Phillips

Square

Torx

Hex

# Screwdriver Bits Technical Information

						
Flat	Oval	Round	Button	Truss	Pan	Socket
Installs flush with metal surfaces or countersinks with softer materials for clean appearance.	Used where countersink installation is desired. Rounded head offers deep recess & is visible just above the surface.	Widely used for general purposes. Features a high crown with a deep recess & smaller diameter head than our Truss or Pan Head designs.	Used for general purposes with a lower crown & shallower recess than our Round Head design.	Low profile offers added security against vice-grips removal. Large diameter head for increased fastening strength.	Features a low profile, large diameter head with a high-edged crown for increased strength.	Features a cylindrical head profile allowing for a deeper recess. This style of head is common amongst TORX® and Hex drive systems.

## Types of Screw Threads

These types have a locating point with either an A or B thread forming screw thread.

Ideal for applications where no pilot holes are required due to a type AB thread with a self drilling point.

Available in both imperial or metric threads, these screws offer a straight sheared point.

## Frequently Asked Questions

### Are your screwdriver bits milled or forged?

Our bits are forged for many reasons such as life & performance. This manufacturing process enables our screwdriver bits to have superior performance characteristics against milled equivalents.

### What is the difference between an insert bit and a power bit?

The insert bits are commonly used with a magnetic bit holder in a power tool. This combination is economical, provides flexibility and allows a fastener to be magnetically held by the bit. The power bits are placed directly into the drill chuck.

### What is ISO-Temp™?

ISO-TEMP™ has been developed to combine both the low wear advantages of extra hard bits and the high elasticity of medium hard bits. This means that ISO-TEMP™ bits ideally suit screw driving in hard materials where high torque peaks need to be counteracted.

### Where do I use reduced diameter bits?

In applications for driving screws below the surface of a drywall.

### Painted, coated and corroded fasteners provide excessive cam-out, what should I do?

ACR® bits, with their extra grip, are a good solution. ACR® bits are available in both insert and power drives.

### How do I identify between Phillips® and Pozidriv® bits?

The shallow 'cross' indentations in the screw head identify a Pozidriv® fastener. The Pozidriv® bit and recess design provides more surface contact between the bit and the screw head than a standard Phillips®. Therefore, the Pozidriv® allows you to apply more torque, reduce the possibility of cam-out. Another way to distinguish the difference is that a Pozidriv® bit can drive a Phillips® screw (but not recommended), whilst a Phillips® bit will struggle to drive a Pozidriv® screw.

### Registered Trademarks:

ACR, PHILLIPS, POZIDRIV, TORQ-SET and TRI-WING are registered trademarks of the Phillips Screw Company.

TORX and TORX-ALIGN are registered trademarks of Camcar Division of Textron.

\*\*Suits Bosch, Dewalt, Hitachi & Makita impact drivers. Item does not have ACR Tip

# Screwdriver Bits Supabit, Hex

**suttontools**

**SUPABIT**  
EXTREME IMPACT

This system is very popular in machine tools and driving deck screws. The vertically sloping side walls of a HEX recess screw head prevent the cam-out recess effect.

**Shank**  
1/4" hex for use in impact drivers and quick change adapters

**Insert**  
1/4" hex for use in bit holders and hand drivers

**Recess Design**  
Provides better mating with the driver, greater driving surface and minimal metal "fall away"

**Application (Hex)**

## Screwdriver Bits Magnetic Screw Guide

# suttontools

Designed to hold extra long fasteners in place.

**Shank**  
1/4" hex for use in power tools  
and quick change adapters

**Rare Earth Magnet**  
4 times stronger than  
standard magnets  
firmly holds screw

**Retracting Sleeve**  
The guide sleeve retracts as the  
fastener is driven into the work  
piece

## Bondhus Professional Quality Tools Provide Superior Value

Time is money, and the real cost of using an inferior tool is realized when something goes wrong. As anyone who works with mechanical devices knows, bad things occasionally happen.

Stripped screw heads are one of those bad things that can happen. A screw with a stripped head can no longer be removed with a screwdriver. If it is in a difficult to reach location, where a clamping device cannot grip it, the task becomes particularly difficult.

The cost of a high quality screwdriver is negligible compared to the cost of removing a stripped screw. Will it take a few hours? What is the real cost of an inexpensive, poor performing screwdriver?

Bondhus quality screwdrivers are made from the finest steels and plastics in our German manufacturing plant, where screwdrivers have been produced for more than 50 years. The purpose of a high quality screwdriver is to provide a faster, easier, less costly means of performing a task. Bondhus strives to provide not just "good" tools, but the strongest tools available anywhere. Customer satisfaction is what we strive for every day.

Bondhus manufactures the highest quality screwdrivers available, and every tool is backed by an unconditional lifetime warranty.

"All Bondhus products are guaranteed for life. If you are not satisfied with a Bondhus tool for any reason simply return it. A replacement will be shipped right out at no cost, no hassles, no questions asked."

A warranty is only as good as the company standing behind it. Bondhus has been the leading innovator in the hand tool industry for over 50 years.

### Series 2000 - ComfortGrip™ Screwdrivers

Features outstanding comfort and grip in a 2-component ergonomic design. The hex shaped handle design provides the best possible contact between the handle and the users hand, while delivering outstanding comfort and torque.

### Series 2000 VDE Insulated - ComfortGrip™ Screwdrivers

Rated for use to 1,000V, tested at 10,000V and with all the benefits from Series 2000 Range of Screwdrivers. The professional choice for electricians.

1000 V

To bear the VDE (Verband der Elektrotechnik) Certification Mark, tools are put through very rigorous testing to ensure that the quality, construction, safety and even ergonomics meet with protective requirements of the applicable EC Directive.

### Series 4000 - PrecisionGrip™ Screwdrivers

Manufactured to the exacting standards required by applications where precision is critical. The ergonomic handle shape allows for either full-hand or finger tip control with reduced effort.

## Screwdrivers Series 2000 ComfortGrip™ Phillips

Chrome-vanadium-molybdenum blades for hardness and high torque applications  
 Chrome-plated for corrosion resistance  
 Precision tip fits screw head exactly

**Printed Blade Tip Symbol**  
 For easy selection

**Precision Tips**  
 For exact fitment

**Anti-roll design**

**Cross hole**  
 Can be used as a lever for higher torque turning
