

## 6L PNEUMATIC & MANUAL OIL EXTRACTOR

L-OE6PM

The 6L Pneumatic and Manual Oil Extractor is a 2 in 1 system which can be used to extract oil either pneumatically with the use of an air compressor or through manual operation by pumping the handle. The Package includes 3 different suction probe to extract oil.

Ideal for extracting engine or transmission oils from cars, motorcycles, boats, jet ski, lawn mowers, ATV and static machines. Can also be used with water based fluids.

**Quick and easy fluid extraction**  
using Pneumatic or Manual  
Operation

**Large polypropylene tank**  
is designed to hold up to 6L of oil at  
temperatures of 100°C

**Integrated pressure relief switch**  
for safe pressure release

**Two probes and extension**  
for fluid removal through  
oil fill tube

**Includes Footstep**  
for stability

**Easy pour top spout**  
for easy disposal

**Muffler**  
for gas and vapor dissipation  
under compression

### TECHNICAL SPECIFICATIONS

- Capacity - 6 Litres
- Max Temp - 100°C
- Working Pressure - 90psi
- Air Inlet Size - 1/4" NPT
- Includes 3 Tubes

### PACKAGE INCLUDES

- 6L Pneumatic & Manual Oil Extractor
- Three Extraction tubes
- Instruction Manual
- Quick Connect Air Coupler
