

## Pump Mounted Oil Bar Tap

High gooseneck allows taller containers to be filled easily when placed on drum top

### L-OBTP

- Pump mounting type - attaches directly to 1/2" BSP (f) pump outlet
- Used to dispense from bulk tank or drum into oil handling equipment (jugs, oil bottles, etc...)
- Can operate from up to 800 psi (55 bar) line pressure
- Lever can be either controlled or locked open for larger fills
- High gooseneck allows taller containers to be filled easily before placed on drum top
- Outlet design avoids splash during dispensing
