## Non-Skid Flooring Aggregates

### Aggregates for Epirez® Anti-Slip Flooring

#### Description

**Non-Skid Flooring Aggregates** are inert granules and sands that are used with the **Supatuff** range of products for anti-skid protection. These anti-skid coatings are excellent for ramps, loading docks, walkways, stairs, where non-skid finish is desired.

#### How to use

Prepare the surface as described in the relevant **Supatuff** technical data sheet. Mix the **Supatuff** according to the directions. Spread it uniformly with a brush, roller or airless spray. Sprinkle the aggregate over the surface. Brush away excess granules the following day after the **Supatuff** has cured. Apply a second coat of **Supatuff**, once the first coat has set, to produce a stronger sealed finish.
