

Pro Bender 35T

Model: PROBENDER

Hydraulic Bending Machine 35 ton force / 415v, 3HP

There are many bending tooling options available for the machine to provide a wide range of bending operations. Optional accessories such as Pipe Bending / Radius tools can further increase the versatility of the machine. This multi-function aspect allows the ProBender 35t Bending Machine to meet the diversified needs of the metal forming industry.

Pro Bender 35T Optional Attachments

Model: PROBENDER-PB-ATTACH

Pipe Bending Attachment

- Comprises of a Pipe Bending frame & the BRAMLEY aluminium alloy elliptical formers for bending pipe from 1/2" - 2" N.B.

Model: PROBENDER-RS-ATTACH

Rebar Bending & Straightening Attachment

- For bending round & reinforcing bar up to 32mm dia.
- Can also be used for straightening up to 40mm dia. round bar or 50 x 25mm flat bar etc

- The standard machine is a robust powered hydraulic bender of 35 tonne rated capacity supplied with attachment for bending flat bar up to 100 x 12 mm or round & square bar up to 25mm

Models:

PROBENDER-TBRD-ATTACH (1/2"-1" Round)

PROBENDER-TBSQ-ATTACH (1/2"-1" Square)

Tube Bending Attachments

- Bender Frame and Formers for tube bending from 1/2" - 1" nominal size across flats.

Model: PROBENDER-LGV-ATTACH

Large V bending Attachment

- Enables bending of larger sections of flat bar such as 75 x 16mm or 50 x 20mm

Other attachments currently under development including a Pipe & Tube Notching attachment, available April 2020
