205L Drum Spill Pallets

Alemlube has added two spill pallets to its already extensive range of spill containment products.

Designed to carry containers and drums up to 205L, the SJ-100-051 is a single 205L drum spill pallet with 250L capacity whereas the SJ-100-06 with 235L capacity can hold up to four 205L drums.

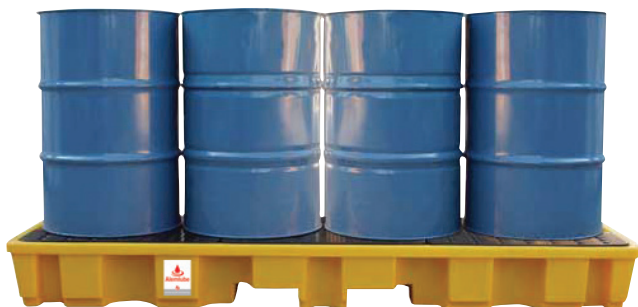

Both static spill pallets have a removable platform, are compatible with most forklifts & pallet trucks and are manufactured from 100% recyclable UV resistant polyethylene. Ease of cleaning is a real feature of these spill pallets and the stackable design allows convenient and safe storage.

In the interests of safety it is recommended that drums/containers are removed before forklifting and moving to another location.

Alemlube's spill containment range assists in addressing OH&S concerns and helps to create a safer more functional workplace.

SJ-100-051

SJ-100-061

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

- Ideal for static spill containment
- 100% recyclable polyethylene construction
- Removable platform
- Easy to clean
- Stackable for safe storage

SJ-100-051 - 1 drum

- Sump capacity: 250L
- Dimensions: 680mm (D) x 1000mm (W) x 600mm (H)
- Weight (empty): 17kg

SJ-100-061 - 4 drum

- Sump capacity: 235L
- Dimensions: 662mm (D) x 2445mm (W) x 270mm (H)
- Weight (empty): 34kg
