## ALE Series Diaphragm Pumps

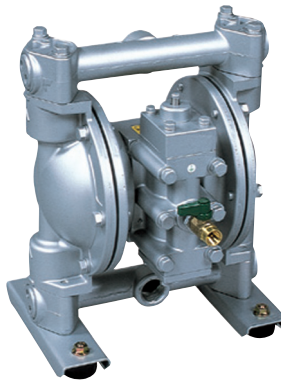

The extensive range of Yamada ALE Series diaphragm pumps from Alemlube will provide you with a reliable and cost effective means of transferring fluids whilst minimising downtime. Capable of flow rates from 10L/min to 540L/min subject to model, these pumps are engineered and manufactured in Japan and are suitable for transferring fluids such as diesel, petrol, oils, waste oil, antifreeze, waste water and many chemicals subject to model and wetted parts. Available in aluminium, poly, stainless steel, kyner and cast iron bodies with a variety of ball, diaphragm and other wetted part materials to suit many applications. Underground coal model also available upon request.

\*Always contact Alemlube for the appropriate model for compatibility of fluid.
