

# TRANSPORT STRAPS

### Fasty straps

Fasty buckles are made of steel, which has many advantages over cast zinc buckles:

- ◆ A larger opening makes the strap much easier to thread through the buckles, especially if work gloves are worn.
- ◆ The buckles are both considerably stronger and lighter than a zinc buckle.
- ◆ They are treated with one of the market's best and most environmentally friendly anti-corrosive coatings, which meets the automotive industry's strict anti-corrosion requirements.
