FEATURES GUIDE

NEW modRIDE MIDSOLE TECHNOLOGY

- BIOMECHANICALLY DESIGNED RANGE
- MIDSOLE DESIGNED TO MODULATE CUSHIONING AND STABILITY

The unique midsole technology platform of the modRIDE is designed to provide a modulated ride from heel strike to toe off. The sole geometry is engineered to provide reduced resistance to compression in zones that need cushioning and increased resistance in zones where additional stability is desired.

LATERAL SIDE

Compression waffle zone for cushioning at heel strike.

PERFORMANCE SYSTEMS

asymBEVEL™

Heel shaped to match the natural heel strike position during walking to maximise contact area and provide a smooth ride.

decoupleGROOVE™

Flex groove along the length of the sole to provide flexibility to allow a smooth transition from initial contact to foot flat and improve terrain adaption.

ADAPTTruss

Truss design providing midfoot support and torsional stability.

WIDEcap

Wide anatomical shaped toecap to reduce rubbing and nerve impingement.

MEDIAL SIDE

Stability waffle zone, added stiffness for a supportive walking gate.
